

Interpretive Thesis – The Positive Prince

Introduction

In the novel "The Positive Prince" under the "Famous Tales", edited by Mary Walker, we look into the journey of the relationship between a statue and a swallow as they grow even closer to each other. In the field of psychology, "Attachment Theory" describes an interesting dynamics of these types of relationships. For one, this can be applied to the interpretation behind the statue and the swallow's attraction patterns in "The Positive Prince".

The Dynamics of the Relationship

According to the concept behind the Attachment Theory, the relationship that exists between the lonely statue and the active swallow can be considered as similar to that of a child-caregiver relationship (APA, 2004). The swallow serves as the caregiver, while the statue can be considered as the child. Take note that it is the dynamics of the actual relationship between the two which is quite similar to the child-caregiver relationship. Similarly, there is also no connection with their actual age.

The Attachment Theory also suggests that the moment the child starts to predict some patterns with his or her caregiver, there will be an expected turn to the relationship. The connection will now start to develop some differences between the individuals, making their relationships quite different from that of other relationships. This particular scenario was easily evident in "The Positive Prince" the moment the relationship starts to develop, coming from an awkward, hesitant state, to that which is more secure. As the two characters started to bond with each other, there have been changes in the way interaction happens.
