

Research Paper Sample Introduction

Business leadership has been described as the 'ability to influence, motivate and enable others to contribute to the effectiveness and success of the organizations of which they are members' (House, Hanges, Javidan, Dorfman, & Gupta, 2004, p. 63). Whether this ability is something a person is born with, or whether it is something that a person can learn, has been the subject of considerable debate. Kambil (2010) has outlined two categories of leadership attributes that help to frame the discussion: 'traits' (mostly innate) and 'skills' which can be developed through experience or training. This essay will draw on the trait theory of leadership to argue that that leaders are first born, but then must be made. While good business leaders share certain traits that are essential to success, including 'curiosity, courage, perseverance, personal ethics and confidence' (Kambil, 2010, p.43), they also need learnable skills, such as communication, negotiation and conflict resolution, that are only developed through practice. A potential leader should develop their natural traits as well as learn and practice skills which will help them to persuade, equip and inspire others to realize their vision.

An Introduction to Literary Studies Mario Klarer, 2023-07-31 The fourth edition of this classic beginner's guide to literary studies has been fully updated throughout. Mario Klarer offers a concise and accessible discussion of central issues in English and world literature as well as film and television series. Starting with the basics of what constitutes a literary text, the book moves through an analysis of major genres, important periods, and key theoretical approaches to literature and film. It also looks at the practicalities of finding and referencing secondary sources when writing a research paper. The expanded new edition has been updated to include a wider range of examples from world literature, cinema, and television series; additional references to contemporary streaming formats; updated chapters on postcolonial theory, cultural studies, gender theory, feminism, and queer theory; new sections on digital humanities, ecocriticism, literary translations, and paratexts; extended explanations of traditional genres, e.g., the epic, drama, and poetry; a completely revised chapter on the most recent MLA guidelines with rules for citing new media formats. The detailed glossary ensures that the book is accessible to readers of any level, making this an ideal self-study guide or a course book for Introduction to Literature classes.

Lab Reports and Projects in Sport and Exercise Science Mike Price, 2021-12-30 Most science degrees will have a practical or laboratory-based component which will require some sort of final report, whether this be a conventional laboratory report or a final year dissertation. All of these formats require students to be able to analyse their data in an appropriate way and subsequently convey their key thoughts and information to a third party. Therefore, writing laboratory reports is an essential part of any science degree. This new revised edition sees the expansion of statistical examples, including initial data checks and assumptions, increased awareness of critical appraisal tools and resources, project planning, and a range of Challenge Yourself activities to supplement understanding and provide a comprehensive overview of what should be contained within each section of a scientific report, and clearly explains how it should be presented. Written in a friendly and engaging style, it guides the reader through abstracts, literature reviews, methodology, reporting, discussions, and referencing, and contains a wealth of examples and practical advice on how to improve and refine your own writing. From writing a first lab report to preparing a final year dissertation or postgraduate thesis, sports and exercise science students at all levels will find this book a valuable resource in developing both skill and confidence in scientific communication. Key features include: The layout of the book is designed to reflect that of a typical scientific report to help students plan their own projects. Each chapter includes numerous examples, exercises, and activities to engage students and develop skills in each aspect of report writing. The book includes discussion of critical appraisal techniques to help students refine their research questions. All data sets and illustrations used are drawn from the key disciplines in sport and exercise science, including physiology, psychology, and biomechanics.
