A Guide to Applied Machine Learning for Biologists Mohammad "Sufian" Badar, 2023-06-21 This textbook is an introductory guide to applied machine learning specifically for biology students. It familiarizes biology students with the basics of modern computer science and mathematics and emphasizes the real world applications of these subjects. The chapters give an overview of computer systems and programming languages to establish a basic understanding of the important concepts in computer systems. Readers are introduced to machine learning and artificial intelligence in the field of bioinformatics connecting these applications to systems biology, biological data analysis and predictions and healthcare diagnosis and treatment. This book offers a necessary foundation for more advanced computer based technologies used in biology employing case studies, real world issues and various examples to guide the reader from the basic prerequisites to machine learning and its applications. Public Health and Beyond in Latin America and the Caribbean Sherri L. Porcelain, 2021-10-01 Public Health and Beyond in Latin America and the Caribbean: Reflections from the Field explores the diverse and complex public health landscape from global to regional to local by considering historical and socio-cultural factors to contextualize the ongoing public health crisis. Drawing on four decades of field experience, research and teaching, Sherri L. Porcelain uses case studies to offer a realistic view of the public health struggle in Latin America and the Caribbean. Using specific countries as regional examples, the book shows how population health has been inextricably linked to political, economic, social, cultural, ethical, ecological, environmental and technological factors. Chapters in this book will examine the history of public health issues associated with international development, globalization and the international political economy, disasters, diplomacy and security studies, coupled with the changing role of key actors driving the global and regional agendas. The final chapter examines the impact of the COVID-19 pandemic and what it means for the future of public health. This book is recommended for undergraduate students interested in the history of Latin America and the Caribbean as well as others concerned with global and regional population health challenges. **Barron's Compact Guide to Colleges** Barron's Educational Series, 2002-08-10 This smaller version of Barron's definitive Profiles of American Colleges presents detailed descriptions of more than 400 accredited four-year schools that fall mainly within the top three categories of Barron's exclusive academic competitiveness scale.
