1.

- Reports usually contain an introduction, subtitles, label and pictures, charts or diagrams to support the information given while a Memo commonly starts with this format: Date, To, From, and Subject.
- Reports is mainly to persuade the reader on that was written on the report while a memorandum is not mainly written on informing the reader but protecting the writer.
- Reports cover a wide variety of topics from business, science or government while a memo only covers business transactions or issues.
- The report are usually more formal than the memo
- Memo format can be used for internal audiences that are in the same company while report are usually used for persuade the reader for a deal.
- Memo are used to present the report to audience
- memo are summarizing the report

2. Farmer markets are implementing all of the tqm to deliver a good quality outcome of the product which is:

- Customer Focused - customer are the judges of the product and its focusing the development for the customers who are buying the product
- Total employee involvement - The employee have the same mindset to achieving the same goals
- Processed central - the process to improve on the process to making a good output
- Integrated system - making a complete and clear step by step to achieve the goals
- strategic and systematic approach - A critical part of the management of quality is the strategic and systematic approach to achsieving an organization's vision, mission, and goals. This process, called strategic planning or strategic management, includes the formulation of a strategic plan that integrates quality as a core component.
- Continual improvement - is a process to always keep improve the product
- Fact- Based Decision Making - it collect data and analyze it to make a more proper decision based on the data.
- Communication - to communicate all of the things to other

3. Total quality management (TQM) is management system or framework that is organized to achieve a long term goal. TQM is need to create an ecosystem that involve all of the member or staff in the organization in order to satisfied the customer. While Quality assurance (QA) is a way of preventing mistakes and defects in manufactured products and avoiding problems when delivering products or services to customers.
