

GEOMETRY PERFORMANCE TASK

Name _____

Area, Perimeter, and Angle Measures

In Covington, USA, all the streets run perfectly north/south or east/west, except Main Street, which runs across Main Street to create a 20° angle at the NW corner (indicated on diagram).

- Water Street is exactly 800 yards north of Conclusive Ave.
 - It is exactly 1800 yards from Main Street due east to the coast.
 - If you are at the corner of Main Street and Water Street, it is only 750 yards due east to the coast.
- ➊ Label the drawing with the above measurements, including what you know about the angles.

You have been commissioned to build a park on the piece of land that is bounded by Water Street, Main Street, and Conclusive Ave. As part of your plan, you are building a semicircular dock that extends out over the water (this is already shown on the diagram).

- ➋ Shade in (lightly please) the region that is the park (including the dock).
- ➌ The Mayor would like to know how big the park will be (including the dock) so that he can write a press release. What will you tell him? Show and explain your work!

Assessment Standards for School Mathematics National Council of Teachers of Mathematics, 1995 This document was created because of the need for new assessment strategies and practices to be developed to enable teachers and others to assess students performance in a manner that reflects the NCTM s reform vision for school mathematics Instead of assuming that the purpose of assessment is to rank students on a particular trait the new approach assumes that high public expectations can be set that every student can strive for and achieve that different

performances can and will meet agreed on expectations and that teachers can be fair and consistent judges of diverse student performances The first sections of the document discuss six mathematics assessment standards 1 The Mathematics Standard 2 The Learning Standard 3 The Equity Standard 4 The Openness Standard 5 The Inferences Standard and 6 The Coherence Standard The use of the assessment standards is then discussed in the context of different purposes such as monitoring students progress making instructional decisions evaluating students achievement and evaluating programs The next section discusses what should happen next with regard to mathematical assessment The document concludes with a glossary and a selected assessment bibliography with 116 citations Contains 28 references MKR
