i) Recording of transactions	Transactions are recorded manually.	Transactions are recorded using computers.
ii) Storage	Transactions are stored in volumes of books.	Transactions are stored in well-designed databases.

Once journal entries are passed or subsidiary books are entered, data are processed automatically and ledger accounts, trial balance and balance sheet are automatically prepared.
iv) Preparation of report	Analysis of financial statements and preparation of report are to be done manually.	Financial statement analysis such as ratio analysis, preparation of cash flow statement, etc. is automatically done.
v) Time involved	It takes lot of time as everything from journalising to report generation is done manually.	It saves lot of time. Time is taken only for passing journal entries or entering data in subsidiary books. Once data are entered, preparation of ledger, trial balance, financial statements or report generation is done within seconds.
vi) Cost involved	The cost is high in manual accounting as several books of account are to be maintained.	The cost is less compared to manual accounting as all the records are kept in soft copy.
