

## Gas Laws Simulation

Use the following simulation to explore the relationship between pressure, volume, and temperature.

1. Describe the three different gases (pressure, molecular mass/weight, and speed/velocity).

2. For each gas, describe the quantity being represented, what physical property that **changes**.
3. How do particles? Particles have a different shape and volume (about 1/1000th).
4. What the relationship is for a fixed amount of gas in the **box**.
5. How do particles? Particles are very separated and moving randomly along the container (not always in the same direction).

Investigate the relationship:

1. Investigate the relationship between the pressure and temperature of the gas in the box.
2. What the relationship is for a fixed amount of gas.
3. Record the relationship's mathematical model in the table.
4. What the relationship is for a fixed amount of gas.
5. Record the relationship's mathematical model in the table.

Temperature, pressure, molecular mass, volume	
Temperature (K)	Pressure (atm)
300	1.00
400	1.33
500	1.67

6. What relationship(s) does the relationship of pressure and temperature of the gas in the box? The pressure of a gas is directly proportional to the temperature of the gas in the box. The pressure of a gas is directly proportional to the temperature of the gas in the box.
