The New Shop Class Joan

Horvath, Richard Cameron, Doug Adrianson, 2015-05-11 *The New Shop Class* connects the worlds of the maker and hacker with that of the scientist and engineer. If you are a parent or educator or a budding maker yourself and you feel overwhelmed with all of the possible technologies, this book will get you started with clear discussions of what open source technologies like 3D printers, Arduinos, robots, and wearable tech can really do in the right hands. Written by real rocket scientist Joan Horvath, author of *Mastering 3D Printing* and 3D printing expert Rich Cameron AKA whosawhatsis, *The New Shop Class* is a friendly, down-to-earth chat about how hands-on making things can lead to a science career. Get practical suggestions about how to use technologies like 3D printing, Arduino, and simple electronics. Learn how to stay a step ahead of the young makers in your life and how to encourage them in maker activities. Discover how engineers and scientists got their start and how their mindsets mirror that of the maker.

Science Simplified: Simple and Fun Science (Book B, Grades 1-3) Dennis McKee and Lynn Wicker, 2021-06-04. The study of science is important because it helps us understand how the world works. One way we learn science is by reading about discoveries made by scientists. Another way is by learning how scientists do their work and then through experiments and activities, make discoveries on our own. The *Simple and Fun Science Simplified* series offers students both paths to understanding science. Answers are provided at the back of the book. Book B is Grades 1-3.

Delta Science Module: Measuring, 1988. Each module contains experiments and worksheets for teaching one aspect of science on a primary or elementary level. *Save the Earth Science Experiments* Elizabeth Snoke Harris, 2008. Going green is a hot topic and a hot science fair project. Author and scientist Elizabeth Snoke Harris knows what impresses and she provides plenty of winning ideas along with step-by-step guidance to insure that the end result is a success. Show how to harness energy with windmills, make a biogas generator, and create alternative fuels. Demonstrate green power with recycled paper, solar building, and compact fluorescent light bulbs. Test the ozone, be a garbage detective, and discuss how to reverse global warming. The importance of what children learn will go even beyond the science fair; they'll have the knowledge to understand what's happening to Planet Earth and the desire to do something eco-friendly every day.
