expert analysis of Gardner's Theory of Multiple Intelligences and the knowledge to extend this theory to effective classroom practice. Broad based and comprehensive, this text describes implications for pedagogy, team teaching, student strengths, curriculum, assessment, community involvement, and diverse classroom models. The authors devote one chapter to each of the eight intelligences. They define intelligence, provide a checklist for identifying it, suggest environmental considerations, and offer related teaching strategies. Additional chapters survey Gardner's recent work on teaching for understanding, performance based assessment, and model MI school programs and student outcomes.

**The Science of Learning & the Art of Teaching** Jerome A. Feldman, Doug McPhee, 2008. The Science of Learning, the Art of Teaching, and its companion field guide provide important information for both new and experienced instructors. The need for new instructors and professors at post secondary institutions is increasing with growing enrollment numbers. This text and its field guide with CD ROM offer insight for the current instructor to make more powerful connections with students and enable the untrained educator to make a successful transition into the classroom. It provides templates for planning a course, syllabus, designing lessons, and preparing activities. The user will also find sections on what the best teachers do that makes a difference, as well as the characteristics of successful students. This material is designed to be utilized as a guide for professional development, and individual instructors will find it valuable for their instructional practice.
