Assessment in Geographical Education: An International Perspective Theresa Bourke, Reece Mills, Rod Lane, 2022-02-27 In recent years there has been increased attention paid to the importance of assessment in Geographical Education the chosen subject for this book Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students teachers parents and policymakers To be effective assessment needs to be valid reliable and fair Validity is about ensuring that we assess what we claim we are assessing Reliability is about measuring performance and understanding in a consistent way Without validity and reliability assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning While there is a substantial literature on evidence based assessment in secondary school contexts research exploring best practice assessment in geography is rare This is a concern given the distinctive nature of geography and the important role of assessment in the learning process This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography The chapters are written by leading researchers in Geographical Education from across the globe These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia USA South Korea Germany Switzerland and Singapore What unifies the work in this book is that each chapter focuses on a key feature of the discipline of geography providing scholarly examples of evidence based practices for assessing student s knowledge and skills

Philosophy of Education in the On-Life Era: The Journey Towards a New Conceptualization of Learning Černý, Michal, 2024-09-27 In the infosphere era the philosophy of education must evolve to address new methods of learning and knowledge communication The infosphere era is characterized by the presence of data and rapid technological advancements calling for a reevaluation of traditional educational frameworks It recognizes the importance of developing digital literacy fostering adaptability and nurturing skills for navigating an ever changing educational landscape Education must now prepare learners to thrive in a complex interconnected world where the boundaries between information technology and human experience are increasingly blurred Philosophy of Education in the On Life Era The Journey Towards a New Conceptualization of Learning offers a comprehensive view of the transformation of the philosophy of education in the infosphere age It uses Luciano Floridi s of transforming educational process ideas as well as Heideggrian phenomenology and pragmatism to highlight aspects of contemporary philosophy of education and perspectives for effective solutions This book covers topics such as educational technologies information literacy and pedagogy and is a useful resource for philosophers education professionals professors teachers academicians scientists and researchers
