*The Military Revolution and Revolutions in Military Affairs* Mark Fissel, 2022-12-05 The Military Revolution and Revolutions in Military Affairs updates two central debates in military history the one surrounding the concept of military revolution and the one on military affairs whilst advancing original research in both fields Only a handful of publications consider the military revolution and the RMA in tandem This book breaks new ground conceptually and appeals to an exceptionally large and diverse readership Comparative revisionist studies of the

military revolution and RMA better enable us to comprehend the historical continuum and reveal the new RMA for what it is And for what it is shortly to become This book presents original contributions within the epicentre of the military revolution debate the 1500s with an emphasis on gunpowder revolution offensively and defensively The connections with the Revolution in Military Affairs are then made explicit by scholars a practitioner and an analyst with an emphasis on airborne lethal autonomous weapons systems This is a chronologically broad and unique methodological approach to a historical debate that begs for clarification as we enter an era where killer robots will almost certainly take from humans their monopoly on violence

**China as a Twenty-First Century Naval Power** Michael A McDevitt, 2020-10-15 Xi Jinping has made his ambitions for the People s Liberation Army PLA perfectly clear there is no mystery what he wants first that China should become a great maritime power and secondly that the PLA become a world class armed force by 2050 He wants this latter objective to be largely completed by 2035 China as a Twenty First Century Naval Power focuses on China s navy and how it is being transformed to satisfy the world class goal Beginning with an exploration of why China is seeking to become such a major maritime power author Michael McDevitt first explores the strategic rationale behind Xi s two objectives China s reliance on foreign trade and overseas interests such as China s Belt and Road strategy In turn this has created concerns within the senior levels of China s military about the vulnerability of its overseas interests and maritime life lines is a major theme McDevitt dubs this China s sea lane anxiety and traces how this has required the PLA Navy to evolve from a near seas focused navy to one that has global reach a blue water navy He details how quickly this transformation has taken place thanks to a patient step by step approach and abundant funding The more than 10 years of anti piracy patrols in the far reaches of the Indian Ocean has acted as a learning curve accelerator to blue

water status McDevitt then explores the PLA Navy's role in the South China Sea and the Indian Ocean. He provides a detailed assessment of what the PLAN will be expected to do if Beijing chooses to attack Taiwan, potentially triggering combat with America's first responders in East Asia, especially the U.S. Seventh Fleet and U.S. Fifth Air Force. He conducts a close exploration of how the PLA Navy fits into China's campaign plan aimed at keeping reinforcing U.S. forces at arm's length, what the Pentagon calls anti-access and area denial (A2/AD), if war has broken out over Taiwan or because of attacks on U.S. allies and friends that live in the shadow of China. McDevitt does not know how Xi defines world class, but the evidence from the past 15 years of building a blue water force has already made the PLA Navy the second largest globally capable navy in the world. This book concludes with a forecast of what Xi's vision of a world class navy might look like in the next fifteen years when the 2035 deadline is reached.

*Phosphorus Pollution Control* Aleksandra Drizo, 2019-10-16. Phosphorus Pollution Control Policies and Strategies. Deterioration and decline of water resources due to pollution caused by humans and their activities has become a universal health, environmental, social, and economic problem. Excess discharges of nutrients, in particular phosphorus, has been recognized as the most prevalent water pollution problem globally. Moreover, its perpetual occurrence and expansion creates imminent threats to water and food security. Despite extensive research during the past five decades, many key questions in eutrophication science remain unanswered. This book summarizes the most recent policies and strategies for phosphorus removal and recovery from municipal, residential, and agricultural wastewater effluents and runoff into a concise and up-to-date volume. The book will be of interest to environmental and water resources scientists and engineers, consultants, policy makers, and practitioners working in the field.

**The Human Side of Cyber Conflict** Panayotis A. Yannakogeorgos, John P. Geis (II), 2016. In response to a tasking from the Air Force chief of staff, the Air Force Research Institute conducted a review of how the service organizes, educates, trains, and equips its cyber workforce. The resulting findings were used to develop recommendations for how the Air Force should recruit, educate, train, and develop cyber operators from the time they are potential accessions until they become senior leaders in the enlisted and officer corps. This study's discoveries, analyses, and recommendations are aimed at guiding staff officers and senior leaders alike as they consider how to develop a future cyber workforce that supports both Air Force and US Cyber Command missions across the range of military operations.
