LEARN EVOLUTION VIRTUAL LAB

ANSWER THE FOLLOWING QUESTIONS AS YOU COMPLETE EACH PART OF THE VIRTUAL LAB

Answer the following questions as you complete each part of the virtual lab.

Part 1: Introduction

1. As you begin the virtual lab, you will see a population of 1000 birds with different wing shapes. What happens when you introduce a new predator? How does the population change over time?

Initially, the birds are spread evenly across the range. However, when the predator is introduced, they concentrate in the tall grasses to avoid being caught. Over time, the population shifts towards birds with longer wings.

2. An adaptation is a trait that helps an organism survive in its environment. How does the virtual lab illustrate natural selection? Provide one example of an adaptation that is favored in this virtual world.

Longer wings help birds fly faster and escape predators more easily. In this virtual world, birds with longer wings survive longer and have more offspring.

3. Explain how the virtual lab illustrates the concept of fitness. How does the virtual lab show that fitness is relative to the environment?

They compete to survive in their environment. The birds with longer wings are fitter in this virtual world.

4. What is the difference between a genotype and a phenotype? Provide one example of how genotype and phenotype are related in the virtual lab.

Genotype is the genetic code, and phenotype is the physical appearance. In the virtual lab, the genotype for longer wings results in a phenotype of longer wings.

5. How does the virtual lab illustrate the concept of evolution?

Evolution is the change in the genetic composition of a population over time. In the virtual lab, the population of birds evolves to have longer wings over time.
