

JAVA Quick Reference

Author: Pauling He
History: 2013 Big Data team
http://www.log4net.com/~pauling_he

Simple Data Types

byte	8	-128..127
short	16	-32,768..32,767
int	32	-2,147,483,648..2,147,483,647
long	64	-9,223,372,036,854,775,808..9,223,372,036,854,775,807
float	32	3.4e-018..3.4e+08
double	64	1.7e-308..1.7e+308
char	16	Complete Unicode Character Set
Boolean		true, false

Declare a variable:
type identifier [= value];

Arrays

int array_name []	Declare an integer array and allocate 000 elements of memory.
array_name = new int [000]	
int array_name [] = new int [000]	Declare and allocate an integer array in one statement.
int array_name [] = { 1, 2, 3, 4, 5 }	
int array_name [] = new int [000]	multidimensional array.
int array_name []	for reference type (class, array).

Class

```
public class class_name  
{  
    // class variable declarations  
    public static void main(String[] args) { statements }  
    // methods  
}
```

Use: object

Methods

(public) private (static) type (void) identifier (arguments) ... { statements }

Variable

(public) private (static) type name [= argument];

Arithmetic Operators

+	addition
-	subtraction
*	multiplication
/	division
%	remainder
++	increment
--	decrement
~	bitwise NOT
&	bitwise AND
	bitwise OR
^	bitwise XOR
&&	bitwise AND assignment
	bitwise OR assignment
^ ^	bitwise XOR assignment
&=	bitwise AND assignment
=	bitwise OR assignment
^=	bitwise XOR assignment

java.awt	Provides classes and interfaces relating to AWT content.
java.io	Provides for system input and output through data streams, serialisation, and the file system.
java.lang	Provides classes that are fundamental to the design of the Java programming language.
java.lang.ref	Provides reference object classes, which support a limited degree of interaction with the garbage collector.
java.lang.reflect	Provides classes and interfaces for obtaining reflective information about classes and objects.
java.math	Provides classes for performing arbitrary-precision integer arithmetic (BigInteger) and arbitrary-precision decimal arithmetic (BigDecimal).
java.net	Provides the classes for implementing networking applications.
java.nio	Defines buffers, which are containers for data, and provides an overview of the other NIO packages.
java.nio.channels	Defines channels, which represent connections to operations, such as files and sockets, defines selectors, the multiplexed, non-blocking I/O systems.
java.nio.channels.spi	Service provider classes for the java.nio.channels package.
java.nio.charset	Defines charsets, decoders, and encoders, for translating between bytes and Unicode characters.
java.nio.charset.spi	Service provider classes for the java.nio.charset package.
java.rmi	Provides the RMI package.
java.rmi.activation	Provides support for RMI Object Activation.
java.rmi.dgc	Provides classes and interfaces for RMI distributed garbage collection (DGC).
java.rmi.registry	Provides a client and two interfaces for the RMI registry.
java.rmi.server	Provides classes and interfaces for supporting the server side of RMI.

+=, -=, *=, /=, %= addition, subtraction, multiplication, division, modulus, increment, decrement.

Relational Operators

==, !=, <, >, <=, >=	equal, not equal, greater, less, greater or equal, less or equal
----------------------	--

Logical Operators

! L1 L2 ^ L3 && L4 AND OR NOT NORL short-circuit-OR_AND

Bitwise Operators

! L1 ^ L2 ^ L3 AND OR NOT NOR shift right, shift right zero fill, shift left

Comments

// rest of line
/** multi-line comment */
/** documentation comment */

Compile and Run

```
java nameOfFile.java  
java nameOfFile
```

CLASSPATH must set correctly.
The name of the file has to match exactly the name of the class.

Flow Control

```
if (boolean expression) statement1; else statement2; {}  
while loop  
do-while loop  
while (boolean expression) {  
    body;  
} (iteration)  
{}  
do while loop  
do {  
    body;  
} (iteration)  
{}  
for loop  
for (initialisation, termination, counter, iteration)  
body;
```

```
Program Structure  
class class_name {  
    public static void main (String args) { }  
    statements;  
}  
method definition;  
---  
method definitionN  
}
```

Key words

abstract	Signature Algorithm keys as defined in NIST's FIPS 186.
java.awt.event	Provides classes and interfaces for key specifications and algorithm parameter specifications.
java.awt.geom	Provides the APIs for accessing and processing data stored in a data source (usually a relational database) using the Java™ programming language.
java.awt.image	Provides classes and interfaces for handling text, data, numbers, and images in a manner independent of natural languages.
java.awt.image.renderable	Contains the collection framework, legacy collection classes, event models, data and image facilities, mathematical, and miscellaneous utility classes to string algorithms, a random number generator, and a bit array.
java.awt.print	Provides classes for reading and writing the EMF (Java Architecture File Format), which is based on the standard ZEP file format with an optional metadata file.
java.awt.print.attribute	Provides the classes and interfaces of the Java™ 2 platform's core logging facilities.
java.awt.print.attribute.standard	This package allows applications to store and retrieve user and system preferences and configuration data.
java.awt.print.attribute.standard	Classes for matching character sequences against patterns specified by regular expressions.
java.awt.print.attribute.standard	Provides classes for reading and writing the standard ZEP and GZIP file formats.

Java extension packages

java.awt.print.attribute.standard	Defines a contract between any interface components and all primitive technology that provides access to these components.
java.awt.print.attribute.standard	Provides the classes and interfaces for cryptographic operations.
java.awt.print.attribute.standard	Provides interfaces for Diffie-Hellman keys as defined in RSA Laboratories' PKCS #3. Based on the standard and implemented in the

java.awt.print.attribute.standard	Provides the classes necessary to create an applet and the classes an applet uses to communicate with its applet context.
java.awt.print.attribute.standard	Contains all of the classes for creating user interfaces and for painting graphics and images.
java.awt.print.attribute.standard	Provides classes for color spaces.
java.awt.print.attribute.standard	Provides interfaces and classes for transferring data between and within applications.
java.awt.print.attribute.standard	Drag and Drop is a direct manipulation paradigm found in many Graphical User Interface systems that provides a mechanism for transferable information between two windows (logically associated with presentation elements in the GUI).
java.awt.print.attribute.standard	Provides interfaces and classes for dealing with different types of events (used by AWT components).
java.awt.print.attribute.standard	Provides classes and interfaces relating to fonts.
java.awt.print.attribute.standard	Provides the Java 2D classes for defining and performing operations on objects related to two-dimensional geometry.
java.awt.print.attribute.standard	Provides classes and interfaces for the input method framework.
java.awt.print.attribute.standard	Provides interfaces that enable the development of input methods that can be used with any Java runtime environment.
java.awt.print.attribute.standard	Provides classes for creating and modifying images.
java.awt.print.attribute.standard	Provides classes and interfaces for producing rendering independent images.
java.awt.print.attribute.standard	Provides classes and interfaces for a general printing API.
java.awt.print.attribute.standard	Contains classes related to developing beans — components based on the "beanshell™" architecture.

Java packages

java.applet	Provides the classes necessary to create an applet and the classes an applet uses to communicate with its applet context.
java.awt	Contains all of the classes for creating user interfaces and for painting graphics and images.
java.awt.color	Provides classes for color spaces.
java.awt.datatransfer	Provides interfaces and classes for transferring data between and within applications.
java.awt.dnd	Drag and Drop is a direct manipulation paradigm found in many Graphical User Interface systems that provides a mechanism for transferable information between two windows (logically associated with presentation elements in the GUI).
java.awt.event	Provides interfaces and classes for dealing with different types of events (used by AWT components).
java.awt.font	Provides classes and interfaces relating to fonts.
java.awt.geom	Provides the Java 2D classes for defining and performing operations on objects related to two-dimensional geometry.
java.awt.im	Provides classes and interfaces for the input method framework.
java.awt.im.spi	Provides interfaces that enable the development of input methods that can be used with any Java runtime environment.
java.awt.image	Provides classes for creating and modifying images.
java.awt.image.renderable	Provides classes and interfaces for producing rendering independent images.
java.awt.print	Provides classes and interfaces for a general printing API.
java.beans	Contains classes related to developing beans — components based on the "beanshell™" architecture.

java.beans.beancontext	Provides classes and interfaces relating to bean content.
java.io	Provides for system input and output through data streams, serialisation, and the file system.
java.lang	Provides classes that are fundamental to the design of the Java programming language.
java.lang.ref	Provides reference object classes, which support a limited degree of interaction with the garbage collector.
java.lang.reflect	Provides classes and interfaces for obtaining reflective information about classes and objects.
java.math	Provides classes for performing arbitrary-precision integer arithmetic (BigInteger) and arbitrary-precision decimal arithmetic (BigDecimal).
java.net	Provides the classes for implementing networking applications.
java.nio	Defines buffers, which are containers for data, and provides an overview of the other NIO packages.
java.nio.channels	Defines channels, which represent connections to operations, such as files and sockets, defines selectors, the multiplexed, non-blocking I/O systems.
java.nio.channels.spi	Service provider classes for the java.nio.channels package.
java.nio.charset	Defines charsets, decoders, and encoders, for translating between bytes and Unicode characters.
java.nio.charset.spi	Service provider classes for the java.nio.charset package.
java.rmi	Provides the RMI package.
java.rmi.activation	Provides support for RMI Object Activation.
java.rmi.dgc	Provides classes and interfaces for RMI distributed garbage collection (DGC).
java.rmi.registry	Provides a client and two interfaces for the RMI registry.
java.rmi.server	Provides classes and interfaces for supporting the server side of RMI.
java.security	Signature Algorithm keys as defined in NIST's FIPS 186.
java.security.spec	Provides classes and interfaces for key specifications and algorithm parameter specifications.
java.sql	Provides the APIs for accessing and processing data stored in a data source (usually a relational database) using the Java™ programming language.
java.text	Provides classes and interfaces for handling text, data, numbers, and images in a manner independent of natural languages.
java.text	Contains the collection framework, legacy collection classes, event models, data and image facilities, mathematical, and miscellaneous utility classes to string algorithms, a random number generator, and a bit array.
java.text.jsp	Provides classes for reading and writing the EMF (Java Architecture File Format), which is based on the standard ZEP file format with an optional metadata file.
java.text.logging	Provides the classes and interfaces of the Java™ 2 platform's core logging facilities.
java.text.regex	This package allows applications to store and retrieve user and system preferences and configuration data.
java.text.spi	Classes for matching character sequences against patterns specified by regular expressions.
java.text.spi	Provides classes for reading and writing the standard ZEP and GZIP file formats.
java.util	Provides classes and interfaces for networking applications.
java.util.concurrent	Provides classes for the secure socket package.
java.util.concurrent	Provides the principal classes and interfaces for the Java™ Print Service API.
java.util.concurrent	Provides classes and interfaces that describe the types of Java™ Print Service attributes and how they can be collected into attribute sets.
java.util.concurrent	Package java.util.concurrent.atomic contains classes for atomic printing attributes.
java.util.concurrent	Package java.util.concurrent.event contains event classes and listener interfaces.
java.util.concurrent	Contains user APIs for RMI DGC.
java.util.concurrent	Contains provability APIs for RMI DGC.
java.util.concurrent	This package provides a framework for authentication and authorization.
java.util.concurrent	This package provides the classes necessary for services to interact with applications in order to receive information (notification data including information on provability, the availability of the display information source and timing messages, for example).
java.util.concurrent	This package provides methods, utilities, classes and interfaces for the

Java Language Reference Guide

Java Language Reference Guide Introduction

In the digital age, access to information has become easier than ever before. The ability to download Java Language Reference Guide has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Java Language Reference Guide has opened up a world of possibilities. Downloading Java Language Reference Guide provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Java Language Reference Guide has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Java Language Reference Guide. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Java Language Reference Guide. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Java Language Reference Guide, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal

information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Java Language Reference Guide has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.

FAQs About Java Language Reference Guide Books

1. Where can I buy Java Language Reference Guide books? Bookstores: Physical bookstores like Barnes & Noble, Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.
2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
3. How do I choose a Java Language Reference Guide book to read? Genres: Consider the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of their work.
4. How do I take care of Java Language Reference Guide books? Storage: Keep them away from direct sunlight and in a dry environment. Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.
5. Can I borrow books without buying them? Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.
6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing, and Book Catalogue are popular apps for tracking your reading progress and managing book collections. Spreadsheets: You can create your own spreadsheet to track books read, ratings, and other details.
7. What are Java Language Reference Guide audiobooks, and where can I find them? Audiobooks: Audio recordings of books, perfect for listening while commuting or multitasking. Platforms: Audible, LibriVox, and Google Play Books offer

- a wide selection of audiobooks.
8. How do I support authors or the book industry? Buy Books: Purchase books from authors or independent bookstores. Reviews: Leave reviews on platforms like Goodreads or Amazon. Promotion: Share your favorite books on social media or recommend them to friends.
 9. Are there book clubs or reading communities I can join? Local Clubs: Check for local book clubs in libraries or community centers. Online Communities: Platforms like Goodreads have virtual book clubs and discussion groups.
 10. Can I read Java Language Reference Guide books for free? Public Domain Books: Many classic books are available for free as they're in the public domain. Free E-books: Some websites offer free e-books legally, like Project Gutenberg or Open Library.
