**Army History**, 1996 [Physicianship and the Rebirth of Medical Education](#) J. Donald Boudreau, Eric Cassell, Abraham Fuks, 2018-02-26 The renewal of medical curricula generally arises from emerging pedagogies e g problem based learning new technologies e g high fidelity simulation or prevailing sociocultural forces e g complexity of health care delivery and team based care Approximately 15 years ago a team of physicians and administrators sought to take this further by considering the very nature of medical practice and the patient physician relationship that is the context and conduit of caring and care they restructured the composition and function of medical education This book *Physicianship and the Rebirth of Medical Education* is the authoritative publication on the philosophy design and implementation of this new curriculum From first year to graduation this book reimagines the education of medical students in its entire scope It discusses the epistemology of clinical practice and pedagogical methods and addresses pragmatic issues of curricular implementation The educational blueprint presented in the book rests on a new definition of sickness one focused on impairments of function as the primary issue of concern for both patients and their care givers This perspective avoids the common shift of medical attention from persons to diseases and thus provides the basis for an authentic and robust patient centered mindset The title of the book refers to a rebirth This implies that there was a previous birth Indeed the critical ingredients of medical education were articulated historically and many features emanate from a time honored apprenticeship model This book recognizes in William Osler and his natural method of teaching the subject of medicine the foundational elements for teaching physicianship The practice of medicine is indelibly relational and in turn medical education is an intellectual and an emotional journey that is rooted in clinical relationships As this book shows medicine must unfold in the context of patient care patients not diseases should be the center of attention
