*The Power of Teacher Teams* Vivian Troen,Katherine Boles,2012 While most educators believe working in teams is valuable not all team efforts lead to instructional improvement Through richly detailed case studies The Power of Teacher Teams demonstrates how schools can transform their teams into more effective learning communities that foster teacher leadership The benefits of successful teacher teams include improved performance for both teachers and students meaningful professional development group adoption of a new curriculum shared insights into student work better classroom management support for new teachers new roles for teacher leaders and opportunitéis for mentor support School leaders will

find guidelines methods and concrete steps for building and sustaining effective teacher teams Also included is a DVD with video case studies and one CD with reproducibles The most important reason for building teacher teams is to enhance student learning through improved instruction and that story is at the heart of this book

**Challenges of Conflicting School Reforms** Mark Berends, JoAn Chun, Gina Schuyler Ikemoto, Sue Stockly, R. J. Briggs, 2002-03-29 A decade ago New American Schools NAS launched an ambitious effort for whole school reform to address the perceived lagging achievement of American students and the lackluster school reform attempts that have produced so few meaningful changes As a private nonprofit organization NAS set out to help schools and districts significantly raise the achievement of large numbers of students by offering whole school designs and design based assistance during the implementation process NAS is currently in the scale up phase of its effort and its designs are being widely diffused to schools across the nation During the 1997\_1998 and 1998\_1999 school years RAND assessed the effects of NAS designs on classroom practice and student achievement in a sample of schools in a high poverty district RAND found that high poverty schools often have fragmented and conflicting environments with difficult and changing political currents and entrenched unions Teachers in high poverty schools tend to face new accountability systems and fluctuating reform agendas These teachers generally lack sufficient time for implementing reform efforts often becoming demoralized and losing their enthusiasm for the difficult task of improving student performance under difficult conditions RAND concluded that high stakes tests may motivate schools to increase performance and to seek out new curricula and instructional strategies associated with comprehensive school reforms However those same tests may provide disincentives to adopt richer more in depth curricula that can succeed in improving the learning opportunities of all students particularly those in high poverty settings
