Still Bigger Than Pink Csp Mirm Lori Lober,2009-05 Conclusion On January 2 2009 I saw my oncologist for my annual scans While I am confident in my wellness and feel better than I have ever felt I cannot help but be a bit nervous each time the tests are run I am alive and well with great news All are clear and I remain no evidence of disease I know dedication to self care and my new IsAgenix regimen are working to create balance in my body allowing for optimum healing My doctors cannot give me definite answers as to why my treatments have been successful when others have failed or even why I m still alive and thriving now NINE years after my stage IV metastatic breast cancer diagnosis However they have said many times that I am a very proactive patient Of course being proactive does not guarantee success and long term survival unfortunately there are no guarantees However I feel that truly believing that I was not going to die most certainly was an important factor In addition to that my faith the support of my family and friends the combination of everything discussed in this book and yes a little luck have all contributed to my long term survival Prior to being diagnosed with cancer I would not necessarily have considered myself an extraordinarily lucky person Now however the quality of life I live every day is much richer the special moments more memorable and the love I have to offer both to myself as well as to others is deeper and more fulfilling This is precisely why I tell everyone I meet that I feel blessed to have actually had cancer and I continue to be deeply grateful to now be healthy and happy Journey well Lori C Lober CSP MIRM
