**The Commander-in-Chief Test** Jeffrey A. Friedman,2023-12-15 In The Commander in Chief Test Jeffrey A Friedman offers a fresh explanation for why Americans are often frustrated by the cost and scope of US foreign policy and how we can fix that for the future Americans frequently criticize US foreign policy for being overly costly and excessively militaristic With its rising defense budgets and open ended forever wars US foreign policy often appears disconnected from public opinion reflecting the views of elites and special interests rather than the attitudes of ordinary citizens The Commander in Chief Test argues that this conventional wisdom underestimates the role public opinion plays in shaping foreign policy Voters may prefer to elect leaders who share their policy views but they prioritize selecting presidents who seem to have the right personal attributes to be an effective commander in chief Leaders then use hawkish foreign policies as tools for showing that they are tough enough to defend America s interests on the international stage This link between leaders policy positions and their personal images steers US foreign policy in directions that are more hawkish than what voters actually want Combining polling data with survey experiments and original archival research on cases from the Vietnam War through the occupations of Iraq and Afghanistan Friedman demonstrates that public opinion plays a surprisingly extensive and often problematic role in shaping US international behavior With the commander in chief test a perennial point of debate in national elections Friedman s insights offer important lessons on how the politics of image making impacts foreign policy and how the public should choose its president *Protecting Lower-income Families While Fighting Global Warming* United States.
