POPcorn facts - Explain to students that they will be counting multiples of 2 about while "blasting and holding their breath" like a corn kernel. When a multiple of 2 is said, students will POP up as they say the multiple of 2, and then return to a small kernel. Example: 2, 4, 6, 8, 10, 12, 14, 16, 18, 20, 22, etc.

- Students count multiples of 2 - POP with multiples of 100
- Students count multiples of 5 - POP with multiples of 50

Arrays, the multiplication symbol "x" and the student's what can be said instead of "times" - Review items of the "groups of" they learned in the last lesson. Draw a model of 3 rows of 4 and ask them what they notice. Explain that the multiplication symbol can also mean "rows of" when doing the operation in rows and columns.

Give each student a piece of the multiplication array graphing paper and make instructions. Have students build the array for each multiplication fact after saying "rows of" instead of "times" (3 x 4 "rows of 4").

After building the array with counters, have students color the grid to show the same model and write the product. Then, students can turn the paper sideways to see the related fact, using the "rows they see" and counting the items in each row. A hand copy is included for teachers to demonstrate correct.

Give each student a copy of the "Arrays of Times" worksheet. Students will fill and glue to match the multiplication fact to the correct array. Then, students will find the product and fill in the blank.

Better Lesson Plans, Better Lessons Ben Curran, 2015-09-25 In today's high stakes world, ready-made lessons and teacher's guides are no longer enough to guarantee achievement. The best way to help students succeed is through deliberate and careful lesson planning focused on the end result of increasing student achievement. Whether you are a new teacher or an experienced educator, this book will help you get started by providing a practical step-by-step guide to designing lessons that will lead to student mastery of any objective. You'll learn the essential components of lessons that are Common Core aligned and grounded in best practices. Topics include Tailoring your lessons to meet your state standards while ensuring high student achievement; Writing a strong objective to stay focused on the goal of a lesson; Creating an end-of-lesson assessment to gauge the lesson's success; Constructing a lesson plan that combines direct instruction, guided practice, and independent practice. Along the way, you'll find plenty of helpful examples from math and English Language Arts. You'll also find end-of-chapter FAQs and activities to try to help you make these concepts a reality for your own classroom. Many of the tools from the book are also available as free downloads from our website www.routledge.com/books/details/9781138838871.
