#### 標記的位置以及再生產

#### WARNING

- This unit is designed to operate with 12V DC (NEGATIVE) ground electrical systems.
- When replacing the fuse, use one with the specified rating for this unit. If the fuse blows frequently, consult your nearest JVC car audio dealer.

#### PRECAUTIONS

- Car's Internal Temperature**  
Before listening to CDs after your car has been parked for some time in low or high temperatures, wait until the temperature inside the car stabilizes.
- Condensation**  
In the following cases, moisture may condense on the lens, a critical part of the CD player, making the CD signal unreadable:  
-- When a heater has just been turned on.  
-- When the humidity is high.  
In these cases, unload the CD magazine and wait for 5 or 10 hours.
- Volume Setting**  
CDs produce very little noise compared with analog sources. If the volume level is adjusted for these sources, the speakers may be damaged by the sudden increase in the output level. Therefore, lower the volume before operation and adjust it as required during playback.

**Mispacking**  
Mispacking may occur when driving on an extremely rough road. The unit and compact disc will not be damaged by mispacking, however, since it is offensive to the ear, stop playback and restart when you reach a road that's in good condition.

#### INSTALLATION

- Avoid installing the unit in the following places:
  - Where it would be exposed to direct sunlight or heat directly from the heater or in an extremely hot place.
  - Where it would be subject to rain, water splashes or excessive humidity.
  - Where it would be subject to dust.
  - Where it would be positioned on an unstable place.
  - Above door-catchers or on the floor under which there is piping.
  - Where it could damage the car's fittings (expose fire, etc.) in or under the trunk.
- Before opening the trunk to install the unit, make sure that there is a sufficient space under the trunk so that you do not dent holes in the fuel tank, etc.
- Firmly install the unit using the provided screws.
