

**FINANCIAL MANAGEMENT - 2012 UNIVERSITY PAPER
SOLUTION**

Section I

I. (a) Explain the following concepts:

- i. Distinguish between Operating Leverage and Financing leverage, (note: put the meaning and any one point for 1 mark)

| SR.NO | Operating Leverage | Financial Leverage |
|-------|---|--|
| 1. | Operating Leverage results from the existence of fixed operating expenses in the firm's income stream. | Financial Leverage results from the presence of fixed financial charges in the firm's income stream. |
| 2. | It is determined by the relationship between a firm's sales revenues and its earnings before interest and taxes. (EBIT) | It is determined by the relationship between a firm's earnings before interest and tax and after subtracting the interest component. |
| 3. | Operating Leverage = $\frac{\text{Contribution}}{\text{EBIT}}$ | Financial Leverage = $\frac{\text{EBIT}}{\text{EBT}}$ |
| 4. | It relates to the Assets side of Balance Sheet. | It relates to the Liability side of the Balance Sheet. |
| 5. | It involves operating risk of being unable to cover fixed operating cost. | It involves financial risk of being unable to cover fixed financial cost. |
| 6. | It is concerned with investment decisions. | It is concerned with financing decisions. |
| 7. | It is described as a first stage leverage. | It is described as a second stage leverage. |

ii. What is "Trading on Equity"?

- (A) Trading on Equity refers to the practice of using borrowed funds which carries a fixed charge, to obtain a higher return to the Equity Shareholders. With a larger proportion of the debt in the financial structure, the earnings, available to the owners would increase more than proportionately, with an increase in the operating profits of the firm. This is because the debt carries a fixed rate of return and if the firm is able to earn, on the borrowed funds, a rate higher than the fixed charges on loans, the benefit will go to the shareholders. This is referred to as "Trading on Equity". But higher trading on equity could increase the financial leverage and could lead to a higher financial risk. Thus the concept of trading on equity is the financial process of using debt to produce gain for the residual owners or the equity shareholders.

iii. What are Gross and Net Working Capital?

- (A) Gross working capital: The gross working capital refers to investment in all the current assets taken together. Net working capital: The term net working capital refers to excess of total current assets over total current liabilities. (CA - CL)

iv. What are Inter corporate Deposits?

Fitting Question Paper Of November 2012
