**Chemistry in the Community (ChemCom)** American Chemical Society, 2011-06-17 Touted as the most successful NSF funded project published Chemistry in the Community ChemCom by the American Chemical Society ACS offers a meaningful and memorable chemistry program for all levels of high school students ChemCom covers traditional chemistry topics within the context of societal issues and real world scenarios Centered on decision making activities where students are responsible for generating data in an investigating analyzing that data and then applying their chemistry knowledge to solve the presented problem The text is intensively laboratory based with all 39 of the investigations integrated within the text not separate from the reading With the ChemCom program students learn more organic and biochemistry more environmental and industrial chemistry and more on the particulate nature of matter than other textbooks all within the relevance of solving problems that arise in everyday life Meticulously updated to meet the needs of today s teachers and students the new sixth edition of ChemCom adheres to the new science framework as well as the forthcoming next generation of science standards Incorporating advances in learning and cognitive sciences ChemCom s wide ranging coverage builds upon the concepts and principles found in the National Science Education Standards Correlations are available showing how closely aligned ChemCom is to these and other state standards

Remote Sensing Tools for Exploration Pamela Elizabeth Clark, Michael Lee Rilee, 2010-07-01 Remote Sensing from a New Perspective The idea for this book began many years ago when I was asked to teach a course on remote sensing Not long before that time I had been part of the effort to develop the first database for planetary data with a common digital array format and interactive processing capabilities to correlate those data easily the lunar consortium All the available lunar remote sensing data were included orbital and ground based ranging across the entire electromagnetic spectrum I had used this powerful tool extensively and in that spirit I was determined to create a course which covered the entire spectrum and a variety of targets As I looked around for the equivalent of a textbook which I was willing to pull together from several sources I realized that available material was very heavily focused on the visual and near visual spectrum and on the Earth as a target Even The Surveillant Science edited by Edward Holz and published in 1973 which broke newground in having diverse articles on most of the spectrum when it was created focused entirely on the Earth My personal favorite the exceedingly well written book on remote sensing by Floyd Sabins first published in 1978 covered the visual infrared and microwave portions of the spectrum beautifully but focused on the Earth as well Unhindered I developed what I called packets of material for each part of the spectrum

**Advances in Cartography and GIScience** Michael P.
