

Description

This guide was developed accordingly to the subject topics that will show up at the National Science Bowl competition. The required texts are adapted from the advanced placement program (or undergraduate studies) and is necessary to gain a basic understanding of the subject. The supplementary texts were developed according to the international olympiad syllabuses and provides a thorough and in-depth coverage of the subject matter. One of the required texts will need to be chosen (based on your speciality) and an outline of a reading schedule produced as a prerequisite to applying for University High School's science bowl team.

If you feel that there are any other texts that can cover the same breadth of the subject matter as the required texts, feel free to use it in replacement. However, create an appropriate reading schedule for it as well.

A great way to obtain these texts is to choose an edition or two older from the most recent as a used book. These sell for much cheaper usually ranging from 5-30 dollars. Don't waste money buying the newer editions, as they contain almost exactly the same information as well as the same diagrams. (Plus these textbooks are for undergraduate studies, and at this level the concepts and content haven't changed for decades)

All the subjects represented in this resource guide are direct correlations to the topic categories as selected by the competition directors.
