

FA Davis Chapter 3 Assessment

Study online at https://quizlet.com/_8rp8h8

Assessment	is the systematic gathering of information related to the physical, mental, spiritual, socioeconomic, and cultural status of an individual, group, or community.
Assessment includes	Collecting data, Using a systematic and ongoing process, Categorizing data, Recording data
Diagnosis	•Data are used to identify the client's actual or potential health problems and strengths.
Planning outcomes and interventions	•Data about the client's motivation, family, and available resources help you and the client formulate realistic goals. •Assessment data help you to choose the most effective interventions for the client.
Implementation	•You gather data by observing the client's responses as you perform interventions.
Evaluation	•You assess client responses to interventions; client responses are data. •Reassessment provides the basis for changes in the care plan.
Medical assessments	§focus on disease and pathology.
Nursing assessments	focus on the client's responses to illness.
Assessment is an essential skill that is endorsed by	•American Nurses Association •National Council of State Boards of Nursing •The Joint Commission
Can I Delegate Assessments?	§A professional nurse must perform the assessment portion of the nursing process. §Nurse aides or other unlicensed assistive personnel (U A P) and licensed practical nurses (L P N's) collect information such as vital signs, pain reports, and fingerstick blood glucose levels. However, it is the responsibility of the professional nurse to assign those tasks, validate the data collected, conduct the interview, and complete the physical assessment.
Delegating	The N C S B N's Model Rules on Delegation (2012, updated 2017) states that the R N may delegate components of care but cannot delegate a task that requires assessment, interpretation, or independent decision making during its performance or at completion.
Types of Data	subjective, objective, Primary, Secondary
Subjective	•What the patient says
objective	•What can be observed or measured
primary data	•Obtained directly from the client
secondary data	•Obtained secondhand through the medical record or another person
Nursing Assessment Skills	§Observation §Physical assessment §Interviewing
Observation	refers to the deliberate use of all of your senses to gather and interpret patient and environmental data. Try to use the same sequence of observation at each patient contact. By making systematic observations each time you are with a patient, you are less likely to miss an assessment area.
Physical Assessment	or physical examination) produces primarily objective data and makes use of the following techniques: inspection (visual examination), palpation (touch), percussion (tapping a body surface), direct auscultation (listening with the unaided ear), and indirect auscultation (listening with a stethoscope)

Myitlab Access Chapter 3 Assessment

Kohei Arai

Myitlab Access Chapter 3 Assessment:

UXD and UCD Approaches for Accessible Education Mendoza-González, Ricardo, Luna-García, Huizilopoztli, Mendoza-González, Alfredo, 2020-01-03 It is widely agreed throughout the world that education and access to education are human rights In order to accommodate the educational needs of people globally technology will be required that supports inclusion and promotes equity for both learning processes and governance in educational institutions In order to achieve this technological resources must be designed to be accessible and usable for all individuals by implementing user centered design UCD and user experience design UXD processes UXD and UCD Approaches for Accessible Education is an academic research publication that explores thoughts and experiences on accessible and equitable education from perspectives on human computer interaction user research and design thinking It seeks to improve the understanding on how technology should be designed to truly contribute to and support accessibility and equity in education Featuring a wide range of topics such as online courses inclusive education and virtual reality this publication is essential for academicians curriculum designers researchers instructional designers educational software developers IT consultants policymakers administrators and students

Intelligent Systems and Applications Kohei Arai, 2021-08-06 This book presents Proceedings of the 2021 Intelligent Systems Conference which is a remarkable collection of chapters covering a wider range of topics in areas of intelligent systems and artificial intelligence and their applications to the real world The conference attracted a total of 496 submissions from many academic pioneering researchers scientists industrial engineers and students from all around the world These submissions underwent a double blind peer review process Of the total submissions 180 submissions have been selected to be included in these proceedings As we witness exponential growth of computational intelligence in several directions and use of intelligent systems in everyday applications this book is an ideal resource for reporting latest innovations and future of AI The chapters include theory and application on all aspects of artificial intelligence from classical to intelligent scope We hope that readers find the book interesting and valuable it provides the state of the art intelligent methods and techniques for solving real world problems along with a vision of the future research
