

For example, if you were creating a communication template to notify the system administrator to create a new user record, your message might be similar to the following message:

Subject — New employee

Message — :FIRSTNAME :LASTNAME was hired on :HIREDATE. Please create a Maximo user record for this individual and e-mail them their user name and password at :EMAIL.EMAILADDRESS.

When Maximo uses a communication template to generate a notification, it replaces the substitution variables with the corresponding values from the record that is generating the notification. A notification generated from the previous example might resemble the following notification:

Subject — New employee

Message — Julie Stickler was hired on 6/01/01. Please create a Maximo user record for this individual and e-mail them their user name and password at Julie.Stickler@mno.com.

TIP To find out the column name for any Maximo field, place the cursor in the field and press Alt+F1. Maximo displays the table and column name associated with the field.

CAUTION If you are including a substitution variable for a non-required field, you should phrase the message so that it still makes sense to the reader if the field is null.

Inserting Hyperlinks

You can insert a hyperlink to a Maximo record within the body of your communication template message that includes the application name and record ID.

To insert a hyperlink in a Workflow communication template, insert the following link into the body of your message:

```
http://:HOSTNAME/maximo/ui/
maximo.jsp?event=loadappfvalue=:APPfuniqueid=:OWNERID
```

where HOSTNAME is the name or IP address of the MXServer.

When Maximo generates a notification, the application name and record ID appear in the message as a hyperlink that leads directly to the record.

NOTE In order to be able to view the record, the e-mail recipient must be a Maximo user with security permission to the specified application.

Modifying Communication Templates

You also can use the Communication Templates application to modify communication templates. You can modify a template without inactivating it. However, you cannot modify a communication template if it is in use on an escalation record, or an enabled or active Workflow process. Maximo displays an error message if you cannot modify a communication template.

Migration Use Cases with the Migration Manager Version 7.5 Rebecca Alsop, Mohamed Amine Bourenane, Brian Davis, Bradley Downing, Vasfi Gucer, Armen Pischdotchian, Sampath Sriramadhesikan, IBM Redbooks, 2013-03-22 By using the Migration Manager you can migrate configuration content from one production environment to another The typical use is to migrate configuration content from a development environment to a test environment and then on to production for the Tivoli process automation engine and its applications such as IBM SmartCloud Control Desk The goal of migration is to ensure that your production environment fully meets the needs of your users This IBM Redbooks publication is an update of the existing book Migration Use Cases with the Migration Manager SG24 7906 and covers the most common migration use cases with the Migration Manager including the capabilities that were introduced with Tivoli s process automation engine V7 5 These use cases are only a small subset of the possible migration scenarios that

can be performed by the Migration Manager but they were chosen to be representative of the capabilities of the Migration Manager In addition to these use cases the book presents a migration strategy and a comprehensive chapter about troubleshooting possible migration problems when the Migration Manager is used We strongly suggest that you read Chapter 1 Migration strategy on page 1 first before reading the other chapters This chapter give syou a good foundation for all of the migration scenarios that are covered in the book This book is a reference for IT Specialists and IT Architects working on migrating configuration content from one production environment to another by using the Migration Manager
