*The Closing of the Liberal Mind* Kim R. Holmes, 2016-04-12 A former U S Assistant Secretary of State and currently a Distinguished Fellow at the Heritage Foundation Kim R Holmes surveys the state of liberalism in America today and finds that it is becoming its opposite illiberalism abandoning the precepts of open mindedness and respect for individual rights liberties and the rule of law upon which the country was founded and becoming instead an intolerant rigidly dogmatic ideology that abhors dissent and stifles free speech Tracing the new illiberalism historically to the radical Enlightenment a movement that rejected the classic liberal ideas of the moderate Enlightenment that were prominent in the American Founding Holmes argues that today s liberalism has forsaken its American roots incorporating instead the authoritarian anti clerical and anti capitalist prejudices of the radical and largely European Left The result is a closing of the American liberal mind Where once freedom of speech and expression were sacrosanct today liberalism employs speech codes trigger warnings boycotts and shaming rituals to stifle freedom of thought expression and action It is no longer appropriate to call it liberalism at all but illiberalism a set of ideas in politics government and popular culture that increasingly reflects authoritarian and even anti democratic values and which is devising new strategies of exclusiveness to eliminate certain ideas and people from the political process Although illiberalism has always been a temptation for American liberals lurking in the radical fringes of the Left it is today the dominant ideology of progressive liberal circles This makes it a new danger not only to the once venerable tradition of liberalism but to the American nation itself which needs a viable liberal tradition that pursues social and economic equality while respecting individual liberties

*Jump-Starting America* Jonathan Gruber, Simon Johnson, 2019-04-09 The untold story of how America once created the most successful economy the world has ever seen and how we can do it again The American economy glitters on the outside but the reality is quite different Job opportunities and economic growth are increasingly concentrated in a few crowded coastal enclaves Corporations and investors are disproportionately developing technologies that benefit the wealthiest Americans in the most prosperous areas and destroying middle class jobs elsewhere To turn this tide we must look to a brilliant and all but forgotten American success story and embark on a plan that will create the industries of the future and the jobs that go with them Beginning in 1940 massive public investment generated breakthroughs in science and technology that first helped win WWII and then created the most successful economy the world has ever seen Private enterprise then built on these breakthroughs to create new industries such as radar jet engines digital computers mobile telecommunications life saving medicines and the internet that became the catalyst for broader economic growth that generated millions of good jobs We lifted almost all boats not just the yachts Jonathan Gruber and Simon Johnson tell the story of this first American growth engine and provide the blueprint for a second It s a visionary pragmatic sure to be controversial plan that will lead to job growth and a new American economy in places now left behind
