Research Handbook on EU Environmental Law Marjan Peeters, Mariolina

Elia Antonio, 2020-06-26 This comprehensive Research Handbook discusses how the EU has used its regulatory power to steer towards environmentally friendly behaviour delving into the deep concerns related to the compliance with and enforcement of EU environmental law It also highlights the important role of civil society s use of environmental procedural rights and characterizes how the CJEU case law has contributed to the effective implementation of EU environmental legislation

Perspectives on Environmental Law Scholarship Ole W. Pedersen, 2018-11-08 This collection invites environmental law scholars to reflect on what it means to be an environmental law scholar and to consider how and why environmental law scholars engage in environmental law scholarship Leading environmental law scholars from different backgrounds and jurisdictions offer their personal reflections on the nature form quality and challenges of environmental law scholarship The collection offers the first honest introspection on what environmental law scholarship is and is not It considers the unique

contributions of environmental law scholarship to legal scholarship more generally reflecting on what sets environmental law scholarship apart from other disciplines of legal scholarship and the challenges arising from these differences

Environmental Law Nancy K. Kubasek, Gary Silverman, 2008 This fundamental introduction to environmental law is designed to introduce those without any legal or special scientific training to the system through which the nation attempts to preserve and protect the different aspects of our environment Environmental law and policy air quality control water quality control toxic substance control waste management and hazardous releases energy natural resources and international environmental law For anyone who is in business or anyone who is simply interested in environmental issues or who has a job where they have to understand environmental law

Agriculture and EU Environmental Law Brian Jack, 2016-03-23 This book critically examines the development and current structure of European Union agri environmental measures at a substantive level Examining the measures in an integrated manner showing how they interrelate linking different aspects of European Union agricultural law and policy this volume examines the legislation adopted at European Union level as well as the impact of particular national measures to implement that legislation Where appropriate comparisons are drawn between the manner in which European Union legislation has been implemented among various Member States Critically assessing European Union and national measures in the light of other policy pressures such as the influence of world trade agreements and the political pressures exerted by the agricultural sector within the national legal systems of individual Member States this volume is a valuable resource for academics researching and practitioners working in the areas of European Union environmental and agricultural law

The 'Ecosystem Approach' in International Environmental Law Vito De Lucia, 2019-03-28 The ecosystem approach broadly understood as a legal and governance strategy for integrated environmental and biodiversity management has been adopted within a wide variety of international environmental legal regimes and provides a narrative a policy approach and in some cases legally binding obligations for States to implement what has been called a new paradigm of environmental management In this last respect the ecosystem approach is also often considered to offer an opportunity to move beyond the outdated anthropocentric framework underpinning much of international environmental law thus helping re think law in the Anthropocene Against this background this book addresses the question of whether the ecosystem approach represents a paradigm shift in international environmental law and governance or whether it is in conceptual and operative continuity with legal modernity This central question is explored through a combined genealogical and biopolitical framework which reveals how the ecosystem approach is the result of multiple contingencies and contestations and of the interplay of divergent and sometimes irreconcilable ideological projects The ecosystem approach this books shows does not have a univocal identity and must be understood as both signalling the potential for a decisive shift in the philosophical orientation of law and the operationalisation of a biopolitical framework of control that is in continuity with and even intensifies the eco destructive tendencies of legal

modernity It is however in revealing this disjunction that the book opens up the possibility of moving beyond the already tired assessment of environmental law through the binary of anthropocentrism and ecocentrism Cases and Materials on Environmental Law Daniel A. Farber, Jody Freeman, Ann E. Carlson, 2010 The Eighth Edition provides up to date treatment of climate change issues This classic casebook provides students with a thorough understanding of all major federal environmental regulatory schemes as well as insight into current policy controversies Particular attention is given to the proper role of cost benefit analysis the appropriate judicial role in reviewing agency decisions and the impact of constitutional decisions relating to federalism standing and takings It also covers the latest Supreme Court cases on subjects from Superfund to water pollution as well as the major regulatory changes in the first year of the Obama Administration

Making Climate Lawyers Kimberly K. Smith, 2024-04-11 Why did it take so long for American law schools to start teaching about climate change Although most environmental law professors were aware of climate change by 1990 it took nearly fifteen years for them to incorporate the topic into their curriculum In her innovative new work Kimberly K Smith explores how American environmental law professors have addressed climate change identifying the barriers they faced how they overcame them and how they created climate law as a domain of legal specialization *Making Climate Lawyers* explores the history of why American law schools were resistant to teaching about climate change and how that changed over the course of a forty year period resulting in law schools across the country incorporating climate change into their curricula with many even establishing centers on the environment Smith challenges dominant explanations of why the United States was slow to develop climate policy it wasn't just political opposition or short sightedness Creating climate legal professionals required changing the fundamentals of legal education Based on dozens of interviews with faculty and students *Making Climate Lawyers* fills a gap in the literature on the intellectual history of climate change most of which focuses on the history of climate science Smith focuses instead on how the climate problem fits or doesn't fit into the structure of American law She uses this story as a lens through which to understand both the transformation of legal education since the 1980s and the nature of climate change as a policy problem *Environmental Law Issues Confronting the Oil and Gas Industry* Insight
