Use of a Multidisciplinary Project to Motivate Students in an Environmental Science Unit William J. Hodges, 1997 **Environmental Science: A Global Concern** William Cunningham, Mary Ann Cunningham, 2009-09-18

Environmental Science A Global Concern Eleventh Edition is a comprehensive presentation of environmental science for non science majors which emphasizes critical thinking environmental responsibility and global awareness. This book is intended for use in a one or two semester course in environmental science human ecology or environmental studies at the college or advanced placement high school level. We have updated data throughout the chapters in this book. Information and examples presented are the most recent available as of the mid 2009. You will find an abundance of specific numbers and current events details that are difficult to keep up to date in a textbook. The goal of this book is to provide an up to date introductory global view of essential themes in environmental science along with emphasis on details and case studies that will help students process and retain the general principles. Because most students who will use this book are freshman or sophomore non science majors the authors make the text readable and accessible without technical jargon or a presumption of prior science background.
