Plate-tectonic theory states that the Earth's lithosphere is broken into very slowly moving pieces or plates. Plate movements over vast stretches of time have led to the current orientation of our continents and oceans. Individual events along plate boundaries, such as earthquakes and volcanic eruptions, pose periodic threats to human activity and ecosystems. The "Ring of Fire" is a term that describes the location of increased seismic and volcanic activity around the margins of the Pacific Ocean basin. On the map above, each dot represents a volcano or an earthquake.

- (a) Japan, Indonesia, and the Philippines are examples of volcanic island chains that have formed along subduction zones between plates in the western Pacific.
- Describe** what happens when two tectonic plates collide along a subduction zone.
 - Explain** how subduction leads to volcanic activity.
- (b) Although the landscape following a volcanic eruption may appear unable to support ecological communities, over time the area can be transformed through succession.
- What is primary succession?
 - Explain** how primary succession can lead to soil formation on a newly formed volcanic landscape.
- (c) In addition to volcanic activity, highly destructive tsunamis are generated along Pacific Plate subduction zones.
- Explain** how a tsunami is generated along a subduction zone.
 - Describe** one negative ecological impact that tsunamis have on coastal environments.
- (d) Southern California experiences periodic devastating earthquakes along the San Andreas Fault, which is a transform boundary located along the eastern edge of the Pacific Plate.
- Describe** what happens to the tectonic plates along a transform boundary at the moment when an earthquake occurs.
 - Describe** what happens to the tectonic plates along a transform boundary during the time between earthquakes.

Post-Vietnam Dioxin Exposure in Agent Orange-Contaminated C-123 Aircraft Institute of Medicine, Board on the Health of Select Populations, Committee to Evaluate the Potential Exposure to Agent Orange/TCDD Residue and Level of Risk of Adverse Health Effects for Aircrew of Post-Vietnam C-123 Aircraft, 2015-05-20 From 1972 to 1982 approximately 1 500 2 100 US Air Force Reserve personnel trained and worked on C 123 aircraft that had formerly been used to spray herbicides in Vietnam as part of Operation Ranch Hand After becoming aware that some of the aircraft on which they had worked had previously served this purpose some of these AF Reservists applied to the US Department of Veterans Affairs VA for compensatory coverage under the Agent Orange Act of 1991 The Act provides health care and disability coverage for health conditions that have been deemed presumptively service related for herbicide exposure during the Vietnam War The VA denied the applications on the basis that these veterans were ineligible because as non Vietnam era veterans or as Vietnam era veterans without boots on the ground service in Vietnam they were not covered However with the knowledge that some air and wipe samples taken between 1979 and 2009 from some of the C 123s used in Operation Ranch Hand showed the presence of agent orange residues representatives of the C 123 Veterans Association began a concerted effort to reverse VA s position and obtain coverage At the request of the VA Post Vietnam Dioxin Exposure in Agent Orange Contaminated C 123 Aircraft evaluates whether or not service in these C 123s could have plausibly resulted in exposures detrimental to the health of these Air Force Reservists The Institute of Medicine assembled an expert committee

to address this question qualitatively but in a scientific and evidence based fashion This report evaluates the reliability of the available information for establishing exposure and addresses and places in context whether any documented residues represent potentially harmful exposure by characterizing the amounts available and the degree to which absorption might be expected Post Vietnam Dioxin Exposure rejects the idea that the dioxin residues detected on interior surfaces of the C 123s were immobile and effectively inaccessible to the Reservists as a source of exposure Accordingly this report states with confidence that the Air Force Reservists were exposed when working in the Operation Ranch Hand C 123s and so experienced some increase in their risk of a variety of adverse responses

Connolly, 2018-02-02 There is ample evidence about the negative effects business activity of all types can have on the provision of human rights Equally there can be little doubt economic development usually driven through business activity and trade is necessary for any state to provide the institutions and infrastructure necessary to secure and provide human rights for their citizens The United Nations and businesses recognise this tension and are collaborating to effect change in business behaviours through voluntary initiatives such as the Global Compact and John Ruggie s Guiding Principles Yet voluntary approaches are evidently failing to prevent human rights violations and there are few alternatives in law for affected communities to seek justice This book seeks to robustly challenge the current status quo of business approaches to human rights in order to develop meaningful alternatives in an attempt to breach the gap between the realities of business

and human rights and its discourse This book was previously published as a special issue of the International Journal of Human Rights *Intellectual Property Issues in Nanotechnology* Chetan Keswani,2020-09-08 Intellectual Property Issues in Nanotechnology focuses on the integrated approach for sustained innovation in various areas of nanotechnology The theme of this book draws to a great extent on the industrial and socio legal implications of intellectual property rights for nanotechnology based advances The book takes a comprehensive look not only at the role of intellectual property rights in omics based research but also at the ethical and intellectual standards and how these can be developed for sustained innovation This book attempts to collate and organize information on current attitudes and policies in several emerging areas of nanotechnology Adopting a unique approach this book integrates science and business for an inside view of the industry Peering behind the scenes it provides a thorough analysis of the foundations of the present day industry for students and professionals alike *Environmental Non-Governmental Organizations (NGOs) in Jordan. Challenges and Obstacles* Lukas Habib,2015-07-22 Master s Thesis from the year 2015 in the subject Politics Topic International Organisations grade 2 0 University of Frankfurt Main course Internationale Studien language English abstract The Hashemite Kingdom of Jordan is characterized by a high vulnerability regarding climate change induced effects and environmental developments As governmental bodies seem to fail the task of preserving the human habitat environmental NGOs are already filling a gap Likewise the cooperation with international organizations is also an important factor for the work of national NGOs This raises the question if and how the government of Jordan and international organization create obstacles for environmental NGOs After conducting an analysis inspired by grounded theory including a two step coding process of primary data it becomes obvious that environmental NGOs in Jordan are facing several challenges Firstly they are adopting governmental tasks Secondly NGOs are challenged by a high level of competition Thirdly they are confronted with difficulties created by international organizations and the government Furthermore those actors are in need of gaining financial security and to improve international cooperation within the Levant to diminish climate change induced effects negative environmental developments and to contribute to a sustainable environment [Annual Report of Progress Airport Cooperative Research Program,2015](#) **5 Steps to a 5: AP Environmental Science 2016** Linda S.
