TEACHING SYLLABUS FOR MATHEMATICS
(JUNIOR HIGH SCHOOL)

RATIONALE FOR TEACHING MATHEMATICS

Development in almost all areas of life is based on effective knowledge of science and mathematics. There simply cannot be any meaningful development in virtually any area of life without knowledge of science and mathematics. It is for that reason that the education systems of countries that are concerned about their development put great deal of emphasis on the study of mathematics. The main rationale for the mathematics syllabus is focused on attaining one crucial goal: to enable all Ghanaian young persons acquire the mathematical skills, insights, attitudes and values that they will need to be successful in their chosen careers and daily lives. The new syllabus is based on the twin premises that all pupils can learn mathematics and that all need to learn mathematics. The syllabus is therefore, designed to meet expected standards of mathematics in many parts of the world. Mathematics at the Junior High school (JHS) in Ghana builds on the knowledge and competencies developed at the primary school level. The pupil is expected at the JHS level to move beyond and use mathematical ideas in investigating real life situations. The strong mathematical competencies developed at the JHS level are necessary requirements for effective study in mathematics, science, commerce, industry and a variety of other professions and vocations for pupils terminating their education at the JHS level as well as for those continuing into tertiary education and beyond.

GENERAL AIMS

The syllabus is designed to help the pupil to:

1. develop basic ideas of quantity and space.
