

# 1's math notebook

All notebook pages must follow some rules to make them interesting as well as informative. Your notebook should reflect your experiences yet be easy to understand and reference.

## RULES

## REASON

Write neatly and legibly	So you are able to read/reference your notebook when needed!
Bring it class everyday	We will use it everyday - like how we use notes, do our work, etc. in class!
Circle or underline numbers if number in pages	To help you find a word or number quickly if you need it when you need!
Color page numbers for each week and use that one	If you forget what a word means, you'll be able to find the definition quickly!
Everything your teacher writes in her notebook, you should write in your notebook	I would not want to hear anything about this! Use me! Write in your notebook!
Use colors when all that are color words in writing!	Colors are a great way to organize our notes in class, like colors and lines!
If you are a day write what you get in notes	You don't want to go to school and not have the notes page to help you. When you're absent, ask your teacher or a friend to borrow a notebook to copy!

Rules, Reputation and Macroeconomic Policy Coordination David A. Currie,Paul Levine,1993-08-12 In this book David Currie and Paul Levine address a broad range of issues concerning the design and conduct of macroeconomic policy in open economies Adopting neo Keynesian models for which monetary and fiscal policy have short term real effects they analyse active stabilisation policies in both a single and multi country context Questions addressed include the merits of simple policy rules policy design in the face of uncertainty and international policy coordination A central feature of the book is the treatment of credibility and the effect of a policy maker s reputation for sticking to announced policies These considerations are integrated with coordination issues to produce a unique synthesis The volume develops optimal control methods and dynamic game theory to handle relationships between governments and a conscious rational private sector and produces a unified coherent approach to the subject This book will be of interest to students and teachers of open economy macroeconomics and to professional economists interested in using macroeconomic models to design policy

*Teaching Mathematics for the 21st Century* Linda Huetinck,Sara N. Munshin,2008 This third edition of Teaching Mathematics for the 21st Century continues to help teachers let the secret out to open up to their students the wonderful discoveries and challenges of the pattern making and problem solving aspects of a fascinating subject mathematics The rationale remains the same to enable prospective and current teachers to access and use tools and strategies to effectively teach mathematics to contemporary students Changing demographics knowledge of how people learn and technology all impact the way we educate our young people This edition incorporates lessons and strategies from programs that have proven success in many types of classrooms Many of these examples help students connect mathematics to real life situations and communicate their understanding of the underlying concepts Although technology is constantly being upgraded ways to increase student motivation through its application remains a goal For example since applets can enhance a lesson whether the teacher uses a computer projector a smart board or has students work individually on computers we have identified several sources of mathematics applets that can be correlated to various lessons Research citations and summaries have been updated to reflect current information on teaching and learning For future teachers
