$$2m - 5\sqrt{mp} - 3p$$

$$2) \frac{-2}{6(x-1)} - \frac{4}{(x-1)} \rightarrow \frac{-2 - 4(6)}{6(x-1)} \rightarrow \frac{-26}{6(x-1)} \rightarrow \frac{-13}{3(x-1)}$$

4) Parallel to  $3x - 4y = 10$  and goes through  $(5, -2)$

$$3x - 10 = 4y$$

$$\frac{3}{4}x - \frac{10}{4} = y$$

$$m = \frac{3}{4}$$

$$y = m(x - x_1) + y_1$$

$$y = \frac{3}{4}(x - 5) - 2 \rightarrow y = \frac{3}{4}x - \frac{15}{4} - \frac{8}{4}$$

5) Perpendicular to  $3x - 4y = 10$   $(5, -2)$

$m = \frac{3}{4}$  perpendicular lines have neg reciprocal slopes

$$m = -\frac{4}{3}$$

$$y = -\frac{4}{3}(x - 5) - 2 \rightarrow y = -\frac{4}{3}x + \frac{20}{3} - \frac{6}{3} \rightarrow y = -\frac{4}{3}x + \frac{14}{3}$$

found that differences in grades between students who take a proctored and unproctored math placement test continue in some cases into the second math course The percentage of F s and withdrawals for initial and second math course final grades between students who take a proctored and unproctored math placement assessment also show differences between groups Applying hierarchical linear regression suggests that test administration modality does not account for a significant amount of variance in course grades When controlling for demographic characteristics and academic factors performance from the initial course taken was found to be the most significant factor of grades in second math course taken Results from the current study suggests that test administration modality during math placement tests while not a statistically significant variable in academic performance in second math course taken may still be helpful as it is a statistically significant variable in academic performance in the first math course taken Since initial math course grades were statistically significant in explaining the difference in grades between groups institutions should consider using proctoring during math placement tests as a practice Further research should be conducted however to understand how test administration modality during placement tests affects students in different programs including programs that do not require courses along the institution s math course sequence Additionally further research on types of proctoring would provide a more comprehensive understanding of the proctoring options available to institutions and whether they result in the same outcomes for students
