

Exponential Growth and Decay

Solve each exponential growth/decay problem.

- 1) For a period of time, an island's population grows at a rate proportional to its population. If the growth rate is 3.8% per year and the current population is 1543, what will the population be 5.2 years from now?
- 2) During the exponential phase, *E. coli* bacteria in a culture increase in number at a rate proportional to the current population. If the growth rate is 1.9% per minute and the current population is 172.0 million, what will the population be 7.2 minutes from now?
- 3) Radioactive isotope Carbon-14 decays at a rate proportional to the amount present. If the decay rate is 12.10% per thousand years and the current mass is 135.2 mg, what will the mass be 2.2 thousand years from now?
- 4) A savings account balance is compounded continuously. If the interest rate is 3.1% per year and the current balance is \$1077.00, in how many years will the balance reach \$1486.73?

1) Using the exponential growth formula, $A = P e^{rt}$, where A is the amount after t years, P is the principal, r is the growth rate, and t is the time in years. In this problem, $P = 1543$, $r = 0.038$, and $t = 5.2$. Substituting these values into the formula, we get $A = 1543 e^{0.038 \cdot 5.2}$. Using a calculator, we find $A \approx 1843.5$. Therefore, the population will be approximately 1843.5 years from now.

2) Using the exponential growth formula, $A = P e^{rt}$, where A is the amount after t minutes, P is the principal, r is the growth rate, and t is the time in minutes. In this problem, $P = 172.0$ million, $r = 0.019$, and $t = 7.2$. Substituting these values into the formula, we get $A = 172.0 e^{0.019 \cdot 7.2}$. Using a calculator, we find $A \approx 184.5$ million. Therefore, the population will be approximately 184.5 million 7.2 minutes from now.

Math Practice Exponential Growth And Decay Problems Kuta Worksheet

Léo Pomar

Math Practice Exponential Growth And Decay Problems Kuta Worksheet:

Enjoying the Beat of Expression: An Mental Symphony within **Math Practice Exponential Growth And Decay Problems Kuta Worksheet**

In a global consumed by screens and the ceaseless chatter of immediate conversation, the melodic beauty and emotional symphony produced by the written term often disappear into the backdrop, eclipsed by the constant noise and interruptions that permeate our lives. Nevertheless, nestled within the pages of **Math Practice Exponential Growth And Decay Problems Kuta Worksheet** a stunning literary prize brimming with natural feelings, lies an immersive symphony waiting to be embraced. Constructed by a wonderful composer of language, this captivating masterpiece conducts readers on a psychological trip, well unraveling the concealed melodies and profound influence resonating within each cautiously constructed phrase. Within the depths of the emotional examination, we can discover the book is key harmonies, analyze its enthralling writing style, and surrender ourselves to the profound resonance that echoes in the depths of readers souls.
