

Intro to Engineering & Design EOC Study Guide

Design Process

1. How might we create the best possible solution to a problem?
Engineers try to think "outside the box" in order to solve new problems or find ways to improve current solutions.
2. What is the most effective way to generate potential solutions to a problem? How many alternate solutions should you generate?
Brainstorming with a group, research and testing possible solutions. Deciding the number of possible solutions is based on many factors, e.g. the complexity of the project, the time available for implementation, the needs of the client, etc.
3. What is an engineer? What types of work do engineers do? Engineering is the application of mathematics and scientific principles to better or improve life. An engineer is a person who is trained in and uses technological and scientific knowledge to solve practical problems. Research, Develop, Design, Supervise, Manage, Production and Construction, Operations, Plant management, and Sales.
4. Why Keep an Engineering Notebook? An engineering notebook is recognized as a legal document that is used in patent activities to...
 - a. Prove the origin of an idea that led to a solution
 - b. Prove when events or ideas occurred
 - c. Prove diligence in turning the idea into a solution
 - d. Prove when an idea became a working solution ("reduced to practice")
5. What are the 4 best Practices for the Engineering Notebook?
 - a. Be Neat,
 - b. be Accurate,
 - c. be Legible,
 - d. Be Thorough.
6. Explain the concept of proportion. Paying close attention to the underlying basic shapes and the relative proportions of various features of the object will allow you to more accurately reflect the true shapes and proportions of the object in your sketch.

Braun,2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators
based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on
test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language
arts with a focus on grades 4 8 Teachers in these subject areas however constitute less than thirty percent of the teacher
workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and
subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range
of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It
addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning
objectives In each case issues related to design and development psychometric considerations and validity challenges are
