BODY LANGUAGE & BEHAVIOR CUSTOMS East & West Arnaud van der Veere,2021-03-12 Most communication is non verbal The way we walk move and look is an expression of who we are and what we think Our body is constantly signing the world who we are and what we want It is a constant interaction with our environment We are constantly reading other people and unconsciously try to understand their signs When confronted with another culture we face the translation problem We are not able to grasp the right meaning in the context of the moment There is no possibility to mirror the movements as they are different of our own There is a communication gap which can create problems When cultures are vastly different the gap is even larger How can we bridge this to create understanding and come to results This book is focused on informing the reader about the Chinese Western gaps the differences and similarities The reason why we focus on this population in Asia is that their influence stretches over thousands of years and through emigration they did influence many other countries in Asia In total worldwide it is considered there are over 2 3 billion Chinese at the moment and still growing Hereby we look at different generations Sometimes we show the past the current time and what is expected to happen in the future Through different levels of communications the world is slowly moving in a common public direction But the situation changes in a more private setting for business
