### Materials

- Fraction Strips (attached)
- Fraction Chart (attached)
- Four-in-a-Row Game Board (attached)
- Adding and Subtracting Fractions Recording Chart (attached)
- Counters of two colors
- Adding and Subtracting Fractions 6x6 Grid Cards (attached)

### Vocabulary

fraction, whole number, proper fraction, numerator, denominator

**Student/Teacher Actions** (what students and teachers should be doing to facilitate learning)

1. For students they will play a Four-in-a-Row game. Group students into pairs, and give each pair a set of Fraction Strips, a Fraction Chart, a Four-in-a-Row Game Board, and four different colored-counters to be used as board markers. Also, give each student a Adding and Subtracting Fractions Recording Chart.
2. Let each student pair decide who goes first. Player 1 chooses two fractions on the Fraction Chart that can be added or subtracted to get one of the answers on the game board. Then Player 1 must demonstrate the problem with the fraction strips (or with another method), after which he or she covers the answer with a marker. Once an answer on the game board has been covered, it cannot be used again. Now students repeat their play on the recording chart.
3. Player 2 now takes a turn. Play continues until someone covers four fractions in a row on the game board—horizontally, vertically, or diagonally.
4. After the game, have a class discussion about the strategies the students used, pointing out the mathematics involved.

### Assessment

- **Questions**
  - What is important to remember when adding and subtracting fractions with like denominators?
  - What is a fraction called when the numerator and denominator are the same number?
- **Journal/Writing Prompts**
  - Explain to your math buddy the steps to adding fractions with like denominators.
