

TEXT FEATURES

Text features refer to the organizational and structural elements of a text that generally help with navigating and meaning-making.

OVERVIEW

A text feature is an element of a text that helps readers to make meaning of the text. They could be used to display information in easy-to-digest ways, help compel the storyline forward, help readers navigate a non-linear text, and structure data in an organized fashion. Without text features, we would simply have big blocks of text that would be tedious to read and comprehend.

EXAMPLES

- **Graphs/Charts:** Visual representations of data. They help to illustrate and explain datasets and relationships between data in a fast and consumable way.
- **Table of Contents:** A list of titles or chapters and the page numbers where they start, usually located at the beginning of a book. They allow readers to navigate the book easily.
