

Introduction to Construction Management

Abstract

This paper introduces the basic principles of construction management, including project planning, scheduling, cost control, and quality assurance.

1. Introduction

Construction management involves the planning, coordination, and control of a project from inception to completion.

2. Project Lifecycle

The lifecycle includes initiation, planning, execution, monitoring, and closure. Each stage has defined deliverables and processes.

3. Key Concepts

Important aspects include work breakdown structures (WBS), Gantt charts, critical path methods (CPM), and earned value management (EVM).

4. Conclusion

Effective construction management ensures that projects are completed on time, within budget, and to specified quality standards.
