Primary Mathematics: Teaching For Understanding Barmby, Patrick, Bilborough, Lynn, Harries, Tony, 2009-09-01 This book addresses the particular areas of mathematics within the primary curriculum that teachers find difficult to teach and in which children struggle to achieve. It begins with introductory sections on how children learn mathematics and is then organised on a subject area basis dealing with the teaching of particular maths topics. Key topics addressed include rounding and measuring means and medians, fractions, negative numbers, commutative and associative laws in number operations and shape and space. Within each chapter the authors examine the themes of representing reasoning and communicating, drawing out both the subject knowledge and ways of teaching each topic. A reference section for studies drawn upon is provided at the end of each chapter.
