Handbook of Education Policy Research Lora Cohen-Vogel, Peter Youngs, Janelle Scott, 2025-07-17 The second edition of the Handbook of Education Policy Research, the largest volume published in AERA's history, addresses a variety of policy and contextual issues in early childhood, K-12, and postsecondary education that have received extensive empirical attention during the past 15 years. With the pandemic and social turmoil as a backdrop, the editors build on the breadth and depth of the first edition while expanding the scope of the project to include subjects, methods, theories, and analyses that have contributed powerfully to the study of education policy and politics in the 2010s and 2020s. The field has become more comprehensive and inclusive, and the authors represent a diversity of racial, ethnic, and gender identities and intellectual and disciplinary orientations. Most chapters come from multiple authors, reflecting the multi-sourced development of research in education policy since the first volume was published. This compilation consists of 70 chapters and nine commentaries that map past, present, and future directions of the field and richly attend to critical issues of interest to students, researchers, policy makers, and practitioners.

Green, Timothy A. Springer, Henrik Holbech, 2018-08-14 A guide to the issues relevant to the design, analysis, and interpretation of toxicity studies that examine chemicals for use in the environment. *Statistical Analysis of Ecotoxicity Studies* offers a guide to the design, analysis, and interpretation of a range of experiments that are used to assess the toxicity of chemicals. While the book highlights ecotoxicity studies, the methods presented are applicable to the broad range of toxicity studies. The text contains myriad datasets from laboratory and field research that clearly illustrate the book's topics. The datasets reveal the techniques, pitfalls, and precautions derived from these studies. The text includes information on recently developed methods for the analysis of severity scores and other ordered responses, as well as extensive power studies of competing tests and computer simulation studies of regression models that offer an understanding of the sensitivity or lack thereof of various methods and the quality of parameter estimates from regression models. The authors also discuss the regulatory process, indicating how test guidelines are developed and review the statistical methodology in current or pending OECD and USEPA ecotoxicity guidelines. This important guide offers the information needed for the design and analysis of a wide array of ecotoxicity experiments and to the development of international test guidelines used to assess the toxicity of chemicals. Contains a thorough examination of the statistical issues that arise in toxicity studies, especially ecotoxicity. Includes an introduction to toxicity experiments and statistical analysis basics. Includes programs in R and Excel. Covers the analysis of continuous and Quantal data analysis of data, as well as Regulatory Issues. Presents additional topics: Mesocosm and Microplate experiments.
