In The End:

Get to the End Michael Hickey,2016-03-07 Get to the End is written about the end times i e the end of the world and history as we know it But it is written from a Catholic perspective There are many books on the market that speak to the end times however they are all written from a Protestant perspective and for the most part they are written by Christians from conservative churches who are generally Fundamentalist Christians There are virtually no books written about the end times from a Catholic perspective The few that have been written with a Catholic perspective of the end times have been written for the most part by Catholic priests and they are generally weighed down heavily in doctrine and dogma This will be one of the first on the subject written by a Catholic layman who has a broader perspective than Catholic Doctrine and Dogma and who views himself as uniquely in the world but not of the world [The Death of Death in the Death of Christ](#) John

Owen,2017-10-12 Owen was a renowned theologian in his day and this work is a piece of theological brilliance in the reformed and protestant tradition The death of Christ had a wide range of implications on the fate of humanity and the cause of redemption that Christ came to give to us all This work goes over all the arguments that have been set up against the reality of Christ s death and Owen brilliantly rebukes these arguments and settles it all [Global Events and Event](#)

[Stratigraphy in the Phanerozoic](#) Otto H. Walliser,2012-12-06 The existence of rapid and even catastrophic turnovers within the Phanerozoic ecosystems has been discussed controversially for more than 170 years Since 1980 this discussion has become even more intensive after the hypothesis of Alvarez explaining the end Cretaceous mass extinction as the result of a huge asteroid impact on the Earth This theory stimulated several thousand papers and is still controversial The international research programme on Global Biological Events in Earth History attempts to bring the discussion back to the facts by using multidisciplinary investigations of the major Phanerozoic events The results of an international group of experts are presented giving a wealth of information and a thorough discussion of the causes of the various global events *Finance*

and Hedging in the Commercial Airline Industry Tony Webber,2024-09-13 When there is political tension or war in the Middle East or in Eastern Europe oil and jet fuel prices shoot upward If an airline isn t protected against these higher prices they can devastate its finances and send it quickly into bankruptcy This seemingly happens on a yearly basis Thankfully for most airlines they are able to protect themselves against higher oil and jet fuel prices at least in the short term by hedging using financial instruments The challenge for airlines is to determine which financial instruments they should use in which products they should hedge and how far out from fuel consumption they should hedge This book systematically explores the different financial instruments that airlines have to choose from and in what situations they should be used It will also present the reader with the options airlines have in terms of manipulating operational levers in response to higher fuel prices such as airfares capacity and fleet size once the protective benefits of hedging wear off
