The Philosophy of Indoctrination Chris Ranalli, 2024-12-16 This book develops and defends a novel social epistemological account of indoctrination It answers important epistemological ethical and political questions about what indoctrination is why it is epistemically harmful how it can be practiced and how we should talk about indoctrination The author presents three views related to the epistemology of indoctrination First he argues that indoctrination is most fundamentally a structural epistemic phenomenon which results in closed minded beliefs The sources of indoctrination are diverse institutional structures technological systems ideological frames and individual actions What unites them is that they lead to the systematic failure to consider seriously the relevant alternatives to what we are taught whether by accident or by design Second he makes the case that indoctrination is always wrong because it disrespects agents in their capacity as epistemic agents even when it results in true belief Third and finally he contends that public indoctrination ascriptions are political propaganda they function to promote political agendas which can ironically breed the conditions for indoctrination rather than forestall it The Philosophy of Indoctrination is an essential resource for researchers and advanced students working in social and political epistemology ethics political philosophy philosophy of education and terrorism and radicalization studies

Two introductory chapters are followed by five chapters that each cover a different genre: Chapter 3 Informational Books, Chapter 4 Fiction, Chapter 5 Biography, Autobiography and Memoir, Chapter 6 Poetry, and Chapter 7 How to and Hands on Books. Each genre chapter consists of four parts: Part 1 Discusses the genre and how content area teachers can use books within that genre to further content learning and enhance literacy skills; Part 2 Offers hands-on instructional strategies and activities using literature with activities for use in a variety of disciplines; Part 3 Presents individual author studies, three or four per chapter, with bibliographies and guidelines for using the authors' books in content area courses; Part 4 Features an annotated bibliography of specially selected children and young adult literature for that genre, organized by content area. The annotations provide information about the book which can be used to prepare booktalks and teaching ideas for using in a specific content area. Altogether, these sections contain more than 600 annotated entries, tabbed by subject area, including art, English language arts, languages and culture, math and technology, music, PE, health, science and social studies, history.

Ambition Emma Ineson, 2019-11-21 Be encouraged by Bishop Emma's advice and inspired by her wisdom and humour. JUSTIN WELBY, ARCHBISHOP OF CANTERBURY. Counting things is very much on the table at the moment. But what is the theology around notions of ambition and success? Why do they sit so uncomfortably in a Christian context? After all, growth is not the preserve of big business when viewed through the lens of the story of God and his people. So we need to ask: what is right about ambition for the Christian leader? And what were Jesus' views? Inevitably, because everything interesting is paradoxical, success and failure are close bedfellows. The single most successful event in the history of humankind, the victory of love over sin and death, looked very much like one man, naked, shamed and abandoned by most of his followers, hanging on a cross. If we keep a vision of the Kingdom of God at the centre of all we do, we cannot go far wrong. This lively and liberating book includes a brilliant take on Jesus' teaching in the Beatitudes for Ambitious Leaders. Here Emma Ineson describes key spiritual dispositions that will enable us, whether in the church or living out our vocation elsewhere, to do just that.
