The book is based on the thesis that we live in a world of abundance full of natural riches and cultural artifacts full of human intellect and powerful technologies. Our thinking, however, is dominated by the opposite: the notion of scarcity. The limits of nature act as an inevitable necessity. In his book, David Schildberger adopts a novel approach to the subject of resources with the help of intelligent instruments that introduce new foods such as chocolate made from cocoa cell cultures and even a fruit-bearing vine raised far from a vineyard. With his imagined scenarios, the author invites the reader to dare stretch their intellectual imaginations and ultimately presents nature as a contingent. Conceptual models on the subject of nature and alternative ways of producing food. Recommended reading for architectural IT specialists. New volume in the Applied Virtuality Book Series.
