Integer Operations Pre Test:

Expanding the Numerical Central Conceptual Structure Laura Christine Bofferding, 2011 In working with integers students have difficulties that may extend into middle school and even adulthood However even young children can display insights into negative numbers well before receiving formal instruction Using a pre test instruction post test design this study explores how 61 first graders reason about negative number properties and operations and how their understanding changes depending on the instruction they receive Results of the study indicate that children build on their existing whole number understanding to develop a central conceptual structure for integers Furthermore the process by which they extend their numerical central conceptual structure differs among students their initial schemas together with the form of the integer instruction influence how they reason about and solve integer addition and subtraction problems These results highlight the need to revisit the placement duration and content of integer instruction in curricula Exploring the Integer Addition and Subtraction Landscape Laura Bofferding, Nicole M. Wessman-Enzinger, 2018-08-24 Over the past few decades there has been increased interest in how students and teachers think and learn about negative numbers from a variety of perspectives In particular there has been debate about when integers should be taught and how to teach them to best support students learning This book brings together recent work from researchers to illuminate the state of our understanding about issues related to integer addition and subtraction with a goal of highlighting how the variety of perspectives support each other or contribute to the field in unique ways In particular this book focuses on three main areas of integer work students thinking models and metaphors and teachers thinking Each chapter highlights a theoretically guided study centered on integer addition and subtraction Internationally known scholars help connect the perspectives and offer additional insights through section commentaries This book is an invaluable resource to those who are interested in mathematics education and numerical thinking *Proceedings of the International Conference on Technology 4 Education 2024, Volume 1* Shitanshu Mishra, Aditi Kothiyal, Sridhar Iyer, Sameer Sahasrabudhe, Andreas Lingnau, Rita Kuo, 2025-09-26 This is volume one of the proceedings from the International Conference on Technology 4 Education 2024 T4E 2024 with each section consisting of distinct peer reviewed research papers making original contributions to research and academia This volume includes papers categorized under Original Research Track Full Papers Experience Report Track Full Papers and the first set of papers from the Original Research Track Short Papers category This novel book pushes the boundaries of research and knowledge in the fields of education educational technology and the learning sciences The main topics of this book are informed by these conference themes Theme 1 Development of technologies to support education Theme 2 Understanding how people learn Theme 3 Pedagogical strategies and interventions Theme 4 Access Scale and Sustainability Theme 5 Culture and Technology Theme 6 Out of School Learning Informal Learning Theme 7 Education for Sustainable Development Goals Theme 8 Democracy Technology and Education This book is a valuable reference for researchers
