Long, Duane W. DeTemple, Richard S. Millman, 2009 The Fifth Edition of *Mathematical Reasoning for Elementary Teachers* with new co author Richard Millman focuses on mathematical knowledge needed for teaching demonstrating why future teachers

are learning math content as well as when they will use it in the classroom. One of the most important aspects of teaching is being able to explain why students' methods and ideas are either right or wrong. Imparting this skill to future teachers is the emphasis of this fantastic text.

Business Math Cheryl Cleaves, Margie Hobbs, 2009

Algebra and Trigonometry Marvin A. Bittinger, Judith A. Beecher, David J. Ellenbogen, Judith A. Penna, 2006

With a visual graphical approach that emphasizes connections among concepts, this text helps students make the most of their study time. The authors show how different mathematical ideas are tied together through their zeros, solutions, and x-intercepts, theme side by side algebraic and graphical solutions, calculator screens, and examples and exercises. By continually reinforcing the connections among various mathematical concepts as well as different solution methods, the authors lead students to the ultimate goal of mastery and success in class.

Building Online Learning Communities Rena M. Palloff, Keith Pratt, 2007-07-20

Building Online Learning Communities further explores the development of virtual classroom environments that foster a sense of community and empower students to take charge of their learning to successfully achieve learning outcomes. This is the second edition of the groundbreaking book by Rena Palloff and Keith Pratt and has been completely updated and expanded to include the most current information on effective online course development and delivery. A practical hands-on guide, this resource is filled with illustrative case studies, vignettes, and examples from a wide variety of successful online courses. The authors offer proven strategies for handling challenges that include:

- Engaging students in the formation of an online learning community
- Establishing a sense of presence online
- Maximizing participation
- Developing effective courses that include collaboration and reflection
- Assessing student performance

Written for faculty in any distance learning environment, this revised edition is based on the authors' many years of work in faculty development for online teaching as well as their extensive personal experience as faculty in online distance education. Rena M. Palloff and Keith Pratt share insights designed to guide readers through the steps of online course design and delivery.

Elementary Algebra with Early Systems of Equations Tom Carson, Elyn Gillespie, 2005-02

Tom Carson engages students in the learning process by meeting them where they are and leading them to where they need to be through the determination of their individual learning style, the development of study skills, and the integration of learning strategies that help each student succeed. Elementary Algebra with Early Systems of Equations is a book for the student. The authors' goal is to help build students' confidence, their understanding, and appreciation of math and their basic skills by presenting an extremely user-friendly text that models a framework in which students can succeed. Unfortunately, students who place into developmental math courses often struggle with math anxiety due to bad experiences in past math courses. Developmental math students often have never developed nor applied a study system in mathematics. To address these needs, the authors have framed three goals for Elementary Algebra 1:

1. reduce math anxiety
2. teach for understanding
3. foster critical thinking and enthusiasm

The authors' writing style is extremely student-friendly. They talk to students in their own language and walk them through the concepts, explaining not only how to do the math but

also why it works and where it comes from rather than using the monkey see monkey do approach that some books take Elementary Algebra with Early Systems of Equations as the title implies places the topic of Systems of Equations early in the text in Chapter 5 This organization is ideal for those instructors who prefer to teach systems of equations immediately following the chapter on graphing and the chapters prior to polynomials and factoring For those who prefer to teach the topic later Elementary Algebra by the same author team places Systems of Equations in Chapter 8 Foundations of Algebra Solving Linear Equations and Inequalities Problem Solving Graphing Linear Equations and Inequalities Systems of Equations Polynomials Factoring Rational Expressions and Equations Roots and Radicals Quadratic Equations For all readers interested in elementary algebra

College Algebra Michael Sullivan, 2005 The Eighth Edition of this highly dependable book retains its best features accuracy precision depth and abundant exercise sets while substantially updating its content and pedagogy Striving to teach mathematics as a way of life Sullivan provides understandable realistic applications that are consistent with the abilities of most readers Chapter topics include Graphs Polynomial and Rational Functions Conics Systems of Equations and Inequalities Exponential and Logarithmic Functions Counting and Probability and more For individuals with an interest in learning algebra as it applies to their everyday lives
