Problem Solving with Maple A First Course applies the mathematical modeling process by formulating building solving
analyzing and criticizing mathematical models It is intended for a course introducing students to mathematical topics they
will revisit within their further studies The authors present mathematical modeling and problem solving topics using Maple

as the computer algebra system for mathematical explorations as well as obtaining plots that help readers perform analyses. The book presents cogent applications that demonstrate an effective use of Maple, provide discussions of the results obtained using Maple, and stimulate thought and analysis of additional applications. Highlights: The book's real world case studies prepare the student for modeling applications. Bridges the study of topics and applications to various fields of mathematics, science, and engineering. Features a flexible format and tiered approach offers courses for students at various levels. The book can be used for students with only algebra or calculus behind them.

About the authors: Dr William P Fox is an emeritus professor in the Department of Defense Analysis at the Naval Postgraduate School. Currently he is an adjunct professor, Department of Mathematics, the College of William and Mary. He received his Ph D at Clemson University and has many publications and scholarly activities including twenty books and over one hundred and fifty journal articles.
