

Wash Those Germs Away!

Did you know ...

Yuck!

People have bunches of germs on their hands, that come in like and out like and are smaller than you and fever and rubes and bad tummy aches, and one gross handshake is all that it takes.

Did you know ...

When somebody's sick, with a cold or the flu, and they cough, cough, cough or they sneeze—
Ka-Choo!—that their hands or their face can catch those germs, too!

Germs are what make people sick—they're tiny and gross and they spread! But you can help stop them from spreading around by washing those germs off and staying them down.

Now this is important—
There are things you must do to make sure those microbes get washed off of you.

Start with clean water to get your hands wet, and if it's warm water, that's that's better yet.
Now add some soap and work up a nice lather, and wash them or rub them, whichever you'd rather.

Wash for 20 seconds. Fifty-two won't suffice! Just sing "Happy Birthday," not one time, but twice.

Whenever you feel a snuffle or sneeze or a tickle or cough or a sneeze or a sneeze, don't let it out. Tell you have tissues, please.

Cover your mouth, and cover your nose. Now it's okay to cough or to blow. Remember used tissues go into the trash. Then wash up your hands with a splash and a splash.

Now rinse them, and dry them with a paper towel or one of those blowers that restaurants have seen.

If you're not near water or this very minute, use hand sanitizer with alcohol in it.

When should you wash up? I'm glad that you asked. When coughing or sneezing, and during these tasks—

before you start cooking and after you're through, after the bathroom or going to the zoo or getting your hair or dog, and what's more, while helping a sick friend or treating a sore.

But when do you do when you need to Ka-Choo and you don't have a tissue or a sick that's near you?

Sneeze into your shoulder! Yes, that's the way to help friends and family keep the germs away, so you'll all have more time to go out and play.

Infection Control Lessons For Children
