

DESIGNING FOR ALL AGES & ABILITIES

Every design must meet the needs of a diverse range of potential bike riders. From youth to seniors, however, every existing and future design should be designed for only the safest people being and include every who might otherwise.

IN AN URBAN & SUBURBAN context, there are many different ways to provide safe and accessible bike routes. While a network of safe, fully accessible routes is essential, it is also important to consider the needs of people with disabilities, including those who use wheelchairs, strollers, and other mobility devices. The design of bike routes should be inclusive and accessible to all.

Urban Bikeway Design Guide

National Association of City Transportation Officials

Third Edition

OUR VISION

Cities where safe, sustainable, and equitable transportation systems connect communities to the resources they need to thrive

The third edition of the Urban Bikeway Design Guide provides updated guidance on how to design safe, sustainable, and equitable transportation systems for all.
