Arrays, the multiplication symbol "x" and the student what can be said instead of "times". Review items of the "groups of" they learned in the last lesson. Draw a model of 3 rows of 4 and ask them what they notice. Explain that the multiplication symbol can also mean "rows of" when doing the operations row and column.

Give each student a piece of the multiplication array graphing paper and make instructions. Have students build the array for each multiplication fact after saying "rows of" instead of "times" (3 x 4 "rows of 4").

After building the array with counters, have students color the grid to show the same model and write the product. Then, students can turn the paper sideways to see the related fact, using the "rows they see" and counting the items in each row. A hand copy is included for teachers to abbreviate lesson.

Give each student a copy of the "Rows of Times" worksheet. Students will fill and glue to match the multiplication fact to the correct array. Then, students will find the product and fill the blank.
