and forever changed our understanding of the universe In 1911 a relatively unknown physicist named Albert Einstein published his preliminary theory of gravity But it hadn t been tested To do that he needed a photograph of starlight as it passed the sun during a total solar eclipse So began a nearly decade long quest by seven determined astronomers from observatories in four countries who traveled the world during five eclipses to capture the elusive sight Over the years they faced thunderstorms the ravages of a world war lost equipment and local superstitions Finally in May of 1919 British expeditions to northern Brazil and the island of Principe managed to photograph the stars confirming Einstein s theory At its heart this is a story of frustration faith and ultimate victory and of the scientists whose efforts helped build the framework for the big bang theory catapulted Einstein to international fame and shook the foundation of physics
