Gijssels, Richard G. Milder, John E. Stinson,2005-12-17 The workplace is changing drastically these days As a consequence of the Information and Communication Technology ICT revolution new economic activities emerge the production process changes people use different communication tools and organizational structures are adjusted All these changes relate to the heart of business and economics and there is no doubt that they will also influence education in these areas Of course ICT provides new technologies to facilitate learning but a changing workplace also requires a renewed focus within the curriculum of economics and business education If ICT is leading to profound change in the workplace is innovation then only a matter of introducing more technology in education Unfortunately this is not necessarily true The translation of changes in the workplace into an improved curriculum requires serious analysis of the essence of the changes at the work place and the way technology may enable student learning For example relevant knowledge is changing faster and faster Does this mean that we have to adopt the curriculum faster and faster Perhaps not as students will have a labor market career of 30 or 40 years Focusing on today s knowledge even if it is very up to date loses more and more value if the life cycle of knowledge becomes shorter Increased speed of change also implies a decrease in the value of knowing all these things *Sheehy's Emergency Nursing* Susan Budassi Sheehy, Emergency Nurses Association,2003 Written by emergency nurses for emergency nurses this comprehensive Bible presents both basic information for students and detailed information for practicing emergency nurses New developments and changes in clinical practice have been incorporated throughout including updated information on cardiac drugs tissue adhesives epidemiological statistics and application of stents A new chapter on Weapons of Mass Destruction helps prepare nurses for any possible acts of terrorism Coverage has been expanded on EMTALA regulations and the HCFA triage wound cleaning and wound management of pediatric patients Written by 51 contributors from rural suburban and urban areas and representing a broad range of clinical positions staff nurses clinical specialists nurse managers and nursing instructors Chapters grouped into six sections for easy access to important content Foundations

Professional Practice Clinical Foundations Trauma Med Surg and Special Populations Tables and boxes highlight and summarize critical and essential information over 500 illustrations help the nurse quickly identify and treat frequently encountered conditions Overview of anatomy and physiology for each clinical chapter facilitates understanding of clinical material and provides basis for patient assessment A separate unit on special patient populations covers topics such as child abuse elder abuse intimate partner violence sexual assault substance abuse and behavioral pediatric obstetrical emergencies Highlights priority nursing diagnoses to help nurses focus on the most serious problems **The Edition XII Guide** Edition XII,1995 Over 500 profiles of Postgraduate Science Health Computer Sciences and Engineering courses A comprehensive reference section with details of over 10 000 Postgraduate Science and Engineering courses There is also practical editorial giving useful and essential advice and information Back cover **Strauss and Mayer's Emergency Department Management** Robert W.
